Foreword

This manual is written for an experienced technician. Essential tools required in performing certain service work are identified in this manual and are recommended for use.

Live with safety: Read the safety messages in the introduction of this manual and the cautions presented throughout the text of the manual.

 This is the safety-alert symbol. When you see this symbol on the machine or in this manual, be alert to the potential for personal injury.

Technical manuals are divided in two parts: repair and operation and tests. Repair sections tell how to repair the components. Operation and tests sections help you identify the majority of routine failures quickly.

Information is organized in groups for the various components requiring service instruction. At the beginning of each group are summary listings of all applicable essential tools, service equipment and tools, other materials needed to do the job, service parts kits, specifications, wear tolerances, and torque values.

Technical Manuals are concise guides for specific machines. They are on-the-job guides containing only the vital information needed for diagnosis, analysis, testing, and repair.

Fundamental service information is available from other sources covering basic theory of operation, fundamentals of troubleshooting, general maintenance, and basic type of failures and their causes.

See DB1990 Service Publications Catalog to order a complete Technical Manual (TM) or a Technical Manual Section (TMS). A complete Repair manual includes the following sections:

- TMS161100 Section 00 General Information
- TMS161101 Sections 01—02 Wheels and Axles
- TMS161103 Sections 03—06 Transmission and Engine
- TMS161109 Sections 09—11 Steering and Brakes
- TMS161116 Sections 16—17 Electrical System and Frame
- TMS161118 Sections 18—20 Operator's Station and Sheet Metal
- TMS161121 Sections 21, 31, 33 Main Hydraulics

**IMPORTANT: Please remove this page and route
through your service department.**

Listed below is a brief explanation of "WHAT" was changed and "WHY" it was changed.

These sectionalized manuals were revised to include the following changes:

1. Section 00:
To include any specifications, oil capacity and miscellaneous changes.
2. Section 01—02:
Miscellaneous wheel specification changes and service brake check added.
3. Section 03—06:
Transmission clutch pack bottom of gear to top of drum distance specification change, miscellaneous changes in charge pump and manifold plate solenoids procedures.
4. Engine flywheel turning tool number change. Fan cap screw torque added.
5. Section 09—11:
6. Section 16—17:
Torque added to engine coolant temperature switch.
7. Section 18—20:
Cab side window torque and thread lock and sealer added. Bushings added to guide on upper rear window. Air suspension seat procedure added.
8. Section 21, 31 and 33:
Torque added to hydraulic pump unloader relief valve. Cooler options added. Multi-purpose bucket and lines added. Shim as required added to bucket links-to-cylinder. Loader control relief valves torques, graphics and procedure changes. Loader cylinder miscellaneous changes.
Backhoe linkage changes. Backhoe boom swing lock arms and locking pin added. Stabilizer valve linkage updates and serial number breaks. Miscellaneous changes to extensible dipperstick and sideshift frame locking pistons. Backhoe control relief valves torques, graphics and procedure changes. Backhoe cylinders serial number breaks and procedure changes.
Extensible dipperstick disassemble and assemble procedure added.

Contents

Handle Fluids Safely—Avoid Fires

When you work around fuel, do not smoke or work near heaters or other fire hazards.

Store flammable fluids away from fire hazards. Do not incinerate or puncture pressurized containers.

Make sure machine is clean of trash, grease, and debris.

Do not store oily rags; they can ignite and burn spontaneously.

DX,FLAME -19-29SEP98-1/1

TS227—UN—23AUG88

Prevent Battery Explosions

Keep sparks, lighted matches, and open flame away from the top of battery. Battery gas can explode.

Never check battery charge by placing a metal object across the posts. Use a volt-meter or hydrometer.

Do not charge a frozen battery; it may explode. Warm battery to 16°C (60°F).

TS204—UN—23AUG88

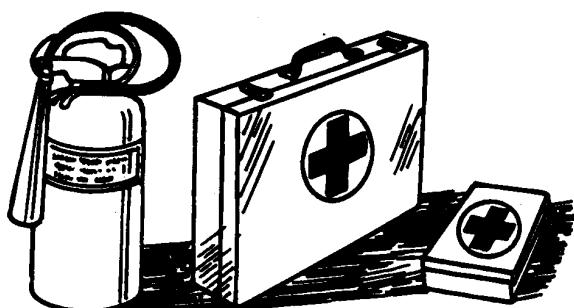

DX,SPARKS -19-03MAR93-1/1

Prepare for Emergencies

Be prepared if a fire starts.

Keep a first aid kit and fire extinguisher handy.

Keep emergency numbers for doctors, ambulance service, hospital, and fire department near your telephone.

TS291—UN—23AUG88

DX,FIRE2 -19-03MAR93-1/1

Prevent Acid Burns

Sulfuric acid in battery electrolyte is poisonous. It is strong enough to burn skin, eat holes in clothing, and cause blindness if splashed into eyes.

Avoid the hazard by:

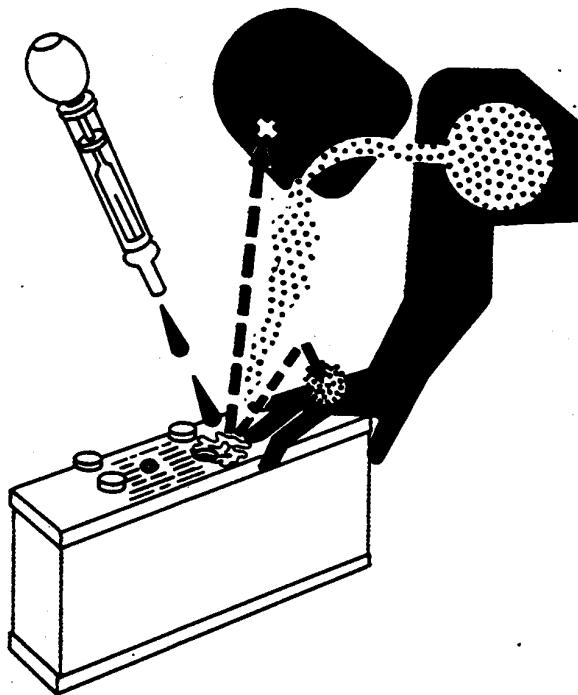

1. Filling batteries in a well-ventilated area.
2. Wearing eye protection and rubber gloves.
3. Avoiding breathing fumes when electrolyte is added.
4. Avoiding spilling or dripping electrolyte.
5. Use proper jump start procedure.

If you spill acid on yourself:

1. Flush your skin with water.
2. Apply baking soda or lime to help neutralize the acid.
3. Flush your eyes with water for 15—30 minutes. Get medical attention immediately.

If acid is swallowed:

1. Do not induce vomiting.
2. Drink large amounts of water or milk, but do not exceed 2 L (2 quarts).
3. Get medical attention immediately.

TS203—UN—23AUG88

DX,POISON -19-21APR93-1/1

Handle Chemical Products Safely

Direct exposure to hazardous chemicals can cause serious injury. Potentially hazardous chemicals used with John Deere equipment include such items as lubricants, coolants, paints, and adhesives.

A Material Safety Data Sheet (MSDS) provides specific details on chemical products: physical and health hazards, safety procedures, and emergency response techniques.

Check the MSDS before you start any job using a hazardous chemical. That way you will know exactly what the risks are and how to do the job safely. Then follow procedures and recommended equipment.

(See your John Deere dealer for MSDS's on chemical products used with John Deere equipment.)

TS132—UN—28NOV90

DX,MSDS,NA -19-03MAR93-1/1

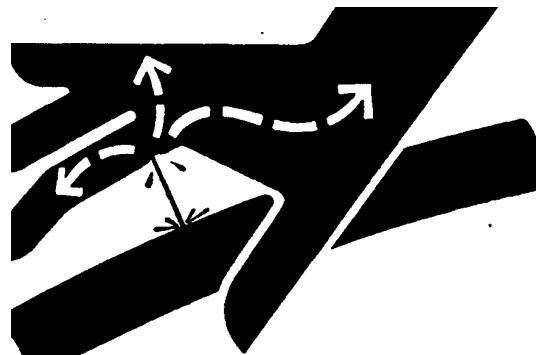

Avoid High-Pressure Fluids

Escaping fluid under pressure can penetrate the skin causing serious injury.

Avoid the hazard by relieving pressure before disconnecting hydraulic or other lines. Tighten all connections before applying pressure.

Search for leaks with a piece of cardboard. Protect hands and body from high-pressure fluids.

If an accident occurs, see a doctor immediately. Any fluid injected into the skin must be surgically removed within a few hours or gangrene may result. Doctors unfamiliar with this type of injury should reference a knowledgeable medical source. Such information is available in English from Deere & Company Medical Department in

X9811-UN-23AUG88

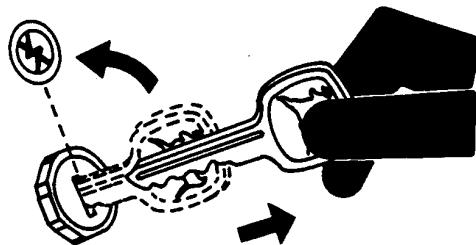

Moline, Illinois, U.S.A., by calling 1-800-822-8262 or +1 309-748-5636.

DX,FLUID -19-20AUG09-1/1

Park Machine Safely

Before working on the machine:

- Lower all equipment to the ground.
- Stop the engine and remove the key.
- Disconnect the battery ground strap.
- Hang a "DO NOT OPERATE" tag in operator station.

TS230-UN-24MAY89

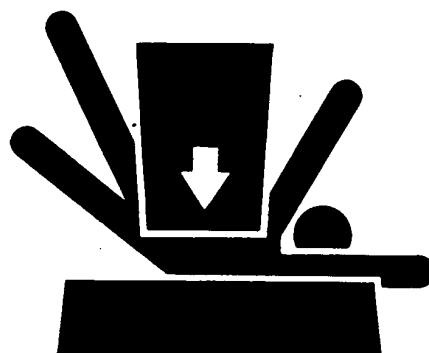

DX,PARK -19-04JUN90-1/1

Support Machine Properly

Always lower the attachment or implement to the ground before you work on the machine. If the work requires that the machine or attachment be lifted, provide secure support for them. If left in a raised position, hydraulically supported devices can settle or leak down.

Do not support the machine on cinder blocks, hollow tiles, or props that may crumble under continuous load. Do not work under a machine that is supported solely by a jack. Follow recommended procedures in this manual.

When implements or attachments are used with a machine, always follow safety precautions listed in the implement or attachment operator's manual.

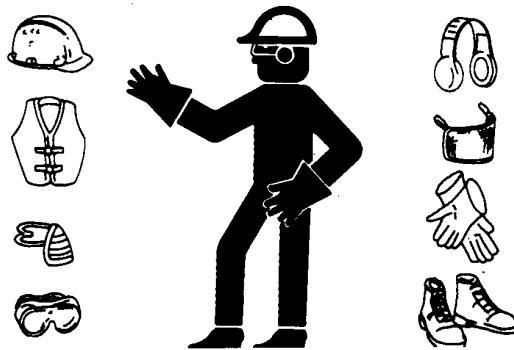

TS229-UN-23AUG88

DX,LOWER -19-24FEB00-1/1

Wear Protective Clothing

Wear close fitting clothing and safety equipment appropriate to the job.

Operating equipment safely requires the full attention of the operator. Do not wear radio or music headphones while operating machine.

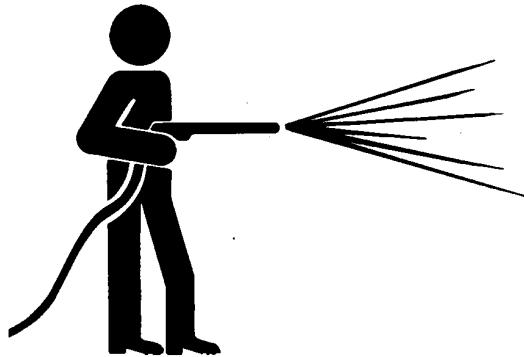

TS206—UN—23AUG88

DX,WEAR2 -19-03MAR93-1/1

Work in Clean Area

Before starting a job:

- Clean work area and machine.
- Make sure you have all necessary tools to do your job.
- Have the right parts on hand.
- Read all instructions thoroughly; do not attempt shortcuts.

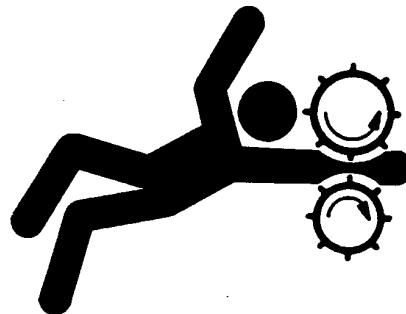

T6642EJ—UN—18OCT88

DX,CLEAN -19-04JUN90-1/1

Service Machines Safely

Tie long hair behind your head. Do not wear a necktie, scarf, loose clothing, or necklace when you work near machine tools or moving parts. If these items were to get caught, severe injury could result.

Remove rings and other jewelry to prevent electrical shorts and entanglement in moving parts.

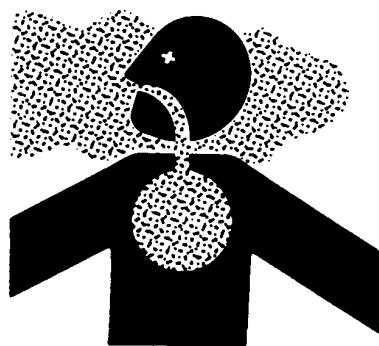

TS228—UN—23AUG88

DX,LOOSE -19-04JUN90-1/1

Work In Ventilated Area

Engine exhaust fumes can cause sickness or death. If it is necessary to run an engine in an enclosed area, remove the exhaust fumes from the area with an exhaust pipe extension.

If you do not have an exhaust pipe extension, open the doors and get outside air into the area.

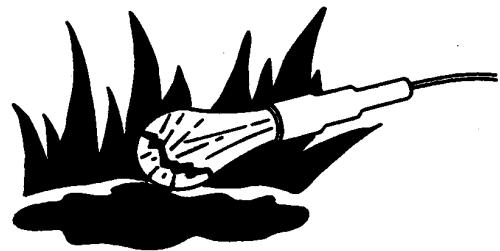

TS220—UN—23AUG88

DX,AIR -19-17FEB99-1/1

Illuminate Work Area Safely

Illuminate your work area adequately but safely. Use a portable safety light for working inside or under the machine. Make sure the bulb is enclosed by a wire cage. The hot filament of an accidentally broken bulb can ignite spilled fuel or oil.

TS223—UN—23AUG88

DX,LIGHT -19-04JUN90-1/1

Replace Safety Signs

Replace missing or damaged safety signs. See the machine operator's manual for correct safety sign placement.

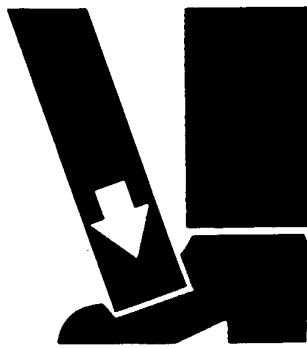

TS201—UN—23AUG88

DX,SIGNS1 -19-04JUN90-1/1

Use Proper Lifting Equipment

Lifting heavy components incorrectly can cause severe injury or machine damage.

Follow recommended procedure for removal and installation of components in the manual.

TS226—UN—23AUG88

DX,LIFT -19-04JUN90-1/1

Remove Paint Before Welding or Heating

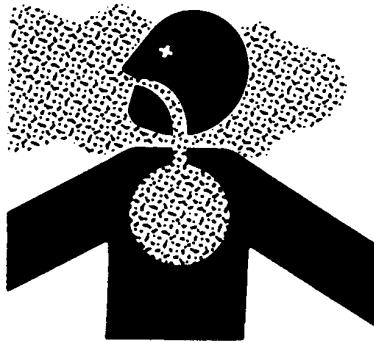

Avoid potentially toxic fumes and dust.

Hazardous fumes can be generated when paint is heated by welding, soldering, or using a torch.

Remove paint before heating:

- Remove paint a minimum of 100 mm (4 in.) from area to be affected by heating. If paint cannot be removed, wear an approved respirator before heating or welding.
- If you sand or grind paint, avoid breathing the dust. Wear an approved respirator.
- If you use solvent or paint stripper, remove stripper with soap and water before welding. Remove solvent or paint stripper containers and other flammable material from area. Allow fumes to disperse at least 15 minutes before welding or heating.

Do not use a chlorinated solvent in areas where welding will take place.

TS220—UN—23AUG88

Do all work in an area that is well ventilated to carry toxic fumes and dust away.

Dispose of paint and solvent properly.

DX,PAINT -19-24JUL02-1/1

Avoid Heating Near Pressurized Fluid Lines

Flammable spray can be generated by heating near pressurized fluid lines, resulting in severe burns to yourself and bystanders. Do not heat by welding, soldering, or using a torch near pressurized fluid lines or other flammable materials. Pressurized lines can accidentally burst when heat goes beyond the immediate flame area.

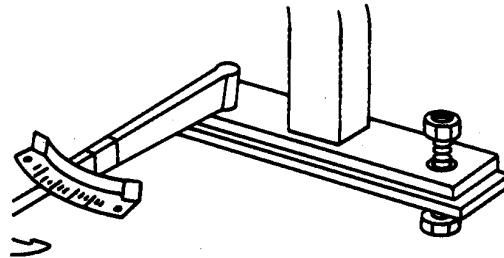

TS953—UN—15MAY90

DX,TORCH -19-10DEC04-1/1

Keep ROPS Installed Properly

Make certain all parts are reinstalled correctly if the roll-over protective structure (ROPS) is loosened or removed for any reason. Tighten mounting bolts to proper torque.

The protection offered by ROPS will be impaired if ROPS is subjected to structural damage, is involved in an overturn incident, or is in any way altered by welding, bending, drilling, or cutting. A damaged ROPS should be replaced, not reused.

TS212—UN—23AUG88

DX,ROPS3 -19-03MAR93-1/1

Service Tires Safely

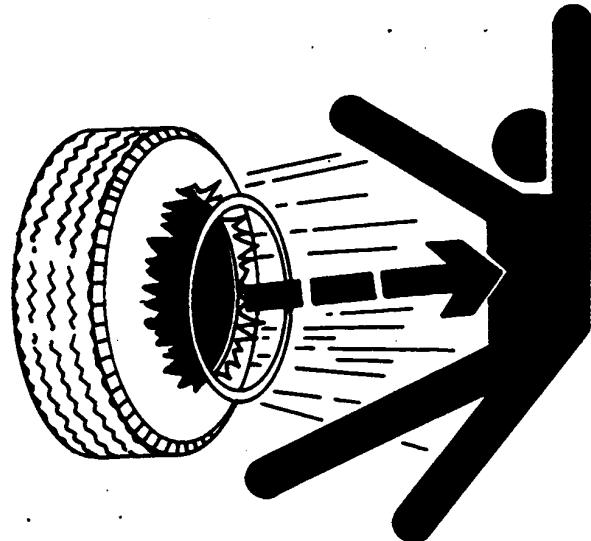

Explosive separation of a tire and rim parts can cause serious injury or death.

Do not attempt to mount a tire unless you have the proper equipment and experience to perform the job.

Always maintain the correct tire pressure. Do not inflate the tires above the recommended pressure. Never weld or heat a wheel and tire assembly. The heat can cause an increase in air pressure resulting in a tire explosion. Welding can structurally weaken or deform the wheel.

When inflating tires, use a clip-on chuck and extension hose long enough to allow you to stand to one side and NOT in front of or over the tire assembly. Use a safety cage if available.

Check wheels for low pressure, cuts, bubbles, damaged rims or missing lug bolts and nuts.

TS211—UN—23AUG88

DX,RIM -19-24AUG90-1/1

Practice Safe Maintenance

Understand service procedure before doing work. Keep area clean and dry.

Never lubricate, service, or adjust machine while it is moving. Keep hands, feet, and clothing from power-driven parts. Disengage all power and operate controls to relieve pressure. Lower equipment to the ground. Stop the engine. Remove the key. Allow machine to cool.

Securely support any machine elements that must be raised for service work.

Keep all parts in good condition and properly installed. Fix damage immediately. Replace worn or broken parts. Remove any buildup of grease, oil, or debris.

On self-propelled equipment, disconnect battery ground cable (-) before making adjustments on electrical systems or welding on machine.

On towed implements, disconnect wiring harnesses from tractor before servicing electrical system components or welding on machine.

TS218—UN—23AUG88

DX,SERV -19-17FEB99-1/1

Use Proper Tools

Use tools appropriate to the work. Makeshift tools and procedures can create safety hazards.

Use power tools only to loosen threaded parts and fasteners.

For loosening and tightening hardware, use the correct size tools. DO NOT use U.S. measurement tools on metric fasteners. Avoid bodily injury caused by slipping wrenches.

Use only service parts meeting John Deere specifications.

TS779—UN—08NOV89

DX,REPAIR -19-17FEB99-1/1

Dispose of Waste Properly

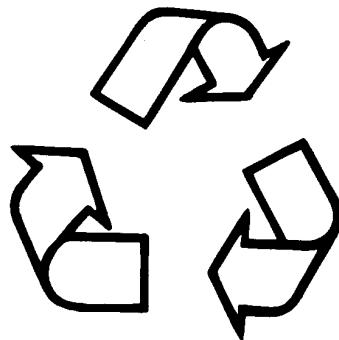

Improperly disposing of waste can threaten the environment and ecology. Potentially harmful waste used with John Deere equipment include such items as oil, fuel, coolant, brake fluid, filters, and batteries.

Use leakproof containers when draining fluids. Do not use food or beverage containers that may mislead someone into drinking from them.

Do not pour waste onto the ground, down a drain, or into any water source.

Air conditioning refrigerants escaping into the air can damage the Earth's atmosphere. Government regulations may require a certified air conditioning service center to recover and recycle used air conditioning refrigerants.

Inquire on the proper way to recycle or dispose of waste from your local environmental or recycling center, or from your John Deere dealer.

TS1133 -UN-26NOV90

DX,DRAIN -19-03MAR93-1/1

Live With Safety

Before returning machine to customer, make sure machine is functioning properly, especially the safety systems. Install all guards and shields.

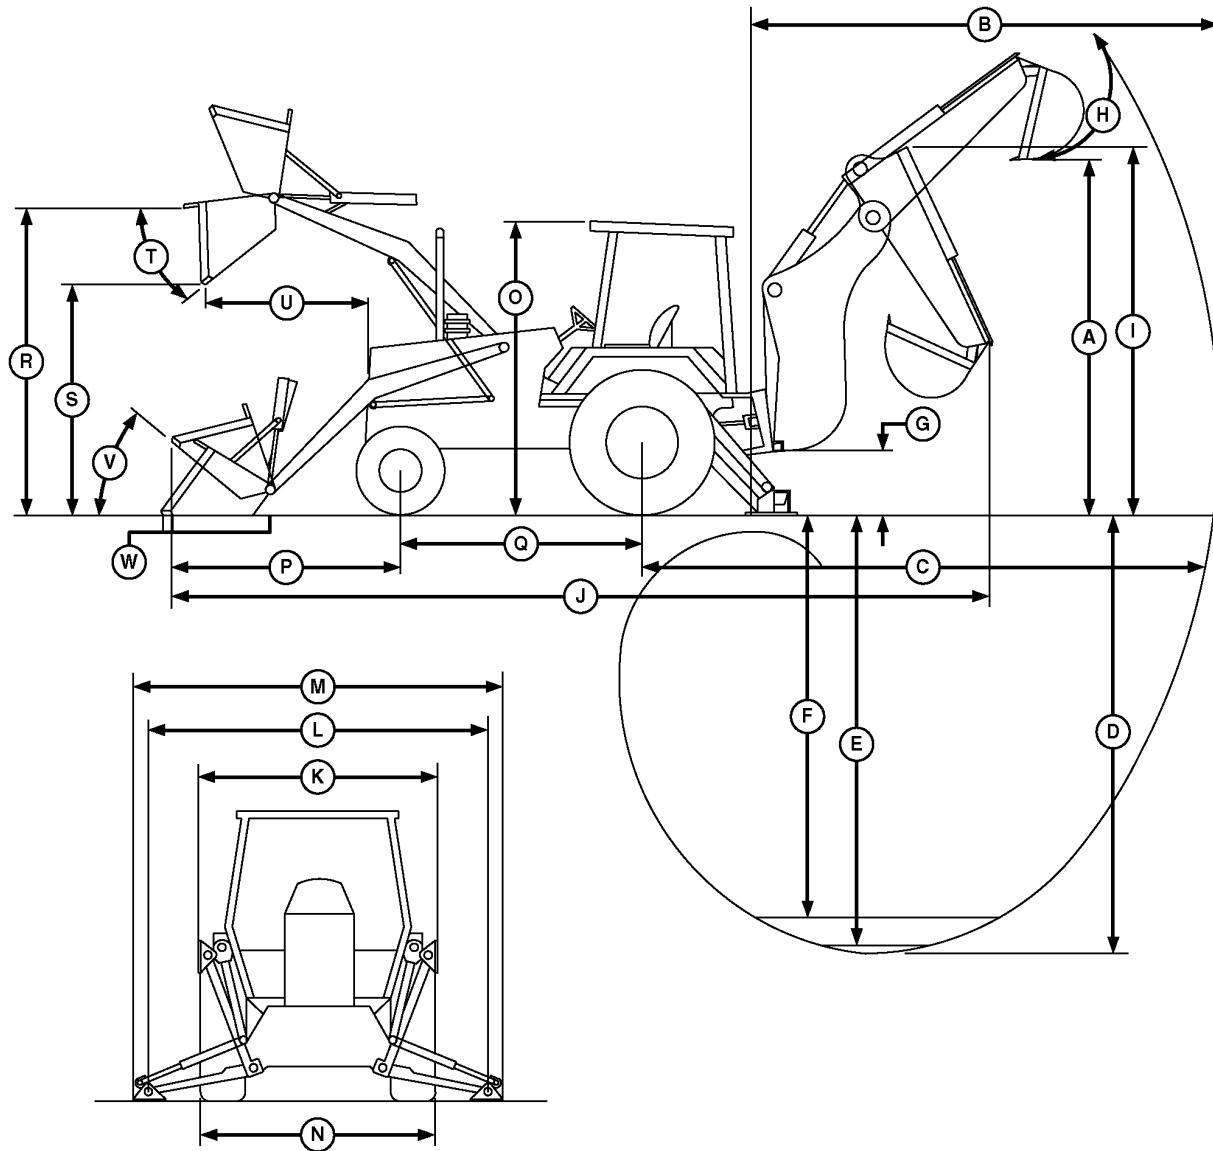

TS231 -19-07OCT88

DX,LIVE -19-25SEP92-1/1

410E Backhoe Loader Specifications

| Item | Measurement | Specification |
|---|-------------|--------------------------------|
| Engine—John Deere 4045T | | |
| Rated Power @ 2200 rpm | Power | SAE gross 73 kW (98 hp) |
| Rated Power @ 2200 rpm | Power | SAE net 67 kW (90 hp) |
| Cylinders | Quantity | 4 |
| Displacement | Volume | 4.52 L (276 in. ³) |
| Engine Torque Rise | Torque | 34% |
| Maximum Engine Net Torque | Torque | 389 N·m (287 lb·ft) |
| Electrical System | Voltage | 12-volt |
| Alternator | Amperage | 65 amps |
| Alternator with Cab | Amperage | 95 amps |
| Item | Measurement | Specification |
| Forward Travel Speeds ¹ with Manual Transmission | | |
| Gear 1 | Speed | 5.8 km/h (3.6 mph) |
| Gear 2 | Speed | 9.5 km/h (5.9 mph) |
| Gear 3 | Speed | 23.2 km/h (14.4 mph) |
| Gear 4 | Speed | 39.3 km/h (24.4 mph) |
| Item | Measurement | Specification |
| Reverse Travel Speeds ¹ with Manual Transmission | | |
| Gear 1 | Speed | 6.4 km/h (4.0 mph) |
| Gear 2 | Speed | 10.6 km/h (6.6 mph) |
| Gear 3 | Speed | 25.9 km/h (16.1 mph) |
| Gear 4 | Speed | 43.8 km/h (27.2 mph) |
| Item | Measurement | Specification |
| Forward Travel Speeds ¹ with Powershift Transmission | | |
| Gear 1 | Speed | 5.8 km/h (3.6 mph) |
| Gear 2 | Speed | 9.5 km/h (5.9 mph) |
| Gear 3 | Speed | 23.2 km/h (14.4 mph) |
| Gear 4 | Speed | 39.3 km/h (24.4 mph) |

NOTE: With powershift transmission, third and fourth gear speeds are the same in reverse.

| Item | Measurement | Specification |
|---|-------------|---------------------|
| Reverse Travel Speeds ¹ with Powershift Transmission | | |
| Gear 1 | Speed | 6.4 km/h (4.0 mph) |
| Gear 2 | Speed | 10.6 km/h (6.0 mph) |

General Specifications

| Item | Measurement | Specification |
|---|--------------------|------------------------|
| Gear 3 | Speed | 25.9 km/h (16.1 mph) |
| Gear 4 | Speed | 43.8 km/h (27.2 mph) |
| Item | Measurement | Specification |
| Steering: Hydrostatic Power | | |
| Non-Powered Axle Curb Turning Radius—Brakes Applied | Radius | 3.56 m (11 ft 8 in.) |
| Non-Powered Axle Curb Turning Radius—Without Brakes | Radius | 4.04 m (13 ft 3 in.) |
| Non-Powered Axle Bucket Clearance Circle—Brakes Applied | Radius | 9.65 m (31 ft 8 in.) |
| Non-Powered Axle Bucket Clearance Circle—Without Brakes | Radius | 10.59 m (34 ft 10 in.) |
| Non-Powered Axle Steering Wheel Turns—Stop to Stop | Quantity | 2.3—3.0 turns |
| Powered Axle (MFWD) Curb Turning Radius—Brakes Applied | Radius | 3.56 m (11 ft 8 in.) |
| Powered Axle (MFWD) Curb Turning Radius—Without Brakes | Radius | 4.04 m (13 ft 3 in.) |
| Powered Axle Bucket Clearance Circle—Brakes Applied | Radius | 9.65 m (31 ft 8 in.) |
| Powered Axle Bucket Clearance Circle—Without Brakes | Radius | 10.59 m (34 ft 9 in.) |
| Non-Powered Axle Steering Wheel Turns—Stop to Stop | Quantity | 2.5 turns |
| Item | Measurement | Specification |
| Hydraulic System: Closed Center | | |
| Main Pressure Relief Setting | Pressure | 25 000 kPa (3625 psi) |
| Flow @ 2200 rpm, Backhoe | Flow Rate | 159 L/min. (42 gpm) |
| Flow @ 2200 rpm, Loader | Flow Rate | 159 L/min. (42 gpm) |

¹With standard 19.5L-24 rear tires.

TX.115.BG331 -19-30SEP97-2/2

Other Information—410E Backhoe Loader**Hydraulic system:**

- Axial piston pump
- 10 micron replaceable element return oil filter

Final drives:

- Heavy-duty inboard mounted planetary
- Evenly distributes axle shock loads over three oil cooled gears

Brakes:

- Hydraulic wet disk
- Mounted inboard
- Self-adjusting
- Self-equalizing

Park brake:

- Independent system
- Spring applied
- Hydraulically released
- Controlled by an electric switch on the side console

Transmission:

- 4-speed helical gear

- Synchronized collar shift transmission with hydraulic reverser
- Torque converter 280 mm (11 in.) with 2.12:1 stall ratio

Lubrication:

- Pressure system with spin-on filter
- Air cleaner
- Dual stage dry, with element and precleaner

Tires:

- Front w/o MFWD—14.5/75-16.1, 10PR F3
- Front w/o MFWD—11L-16, 12PR F3
- Front with MFWD—12.5/80, 10PR
- Rear w/o MFWD—19.5L-24, 10PR R4
- Rear w/o MFWD—21L-24, 10PR R4
- Rear with MFWD—19.5L-24, 10PR R4
- Rear with MFWD—21L-24, 10PR R4

Operator Control:

- Backhoe w/o Ext. Dipperstick
 - Two Levers
- Backhoe w/Ext. Dipperstick Retracted
 - Right Foot Treadle
- Backhoe w/Ext. Dipperstick Retracted
 - Right Foot Treadle

CED.0UO1032,1006 -19-09JUN98-1/1

410E Backhoe Loader Weight

| Item | Measurement | Specification |
|--------------------------------|-------------|---------------------|
| Transporting | | |
| SAE Operating Weight with ROPS | Weight | 5806 kg (12,800 lb) |
| Cab Added | Weight | 263 kg (580 lb) |
| MFWD with Tires Added | Weight | 168 kg (370 lb) |
| Extendible Dipperstick | Weight | 200 kg (440 lb) |
| Optional Front Counterweight | Weight | 181 kg (400 lb) |
| Optional Front Counterweight | Weight | 295 kg (650 lb) |

410E Backhoe Loader Drain and Refill Capacities

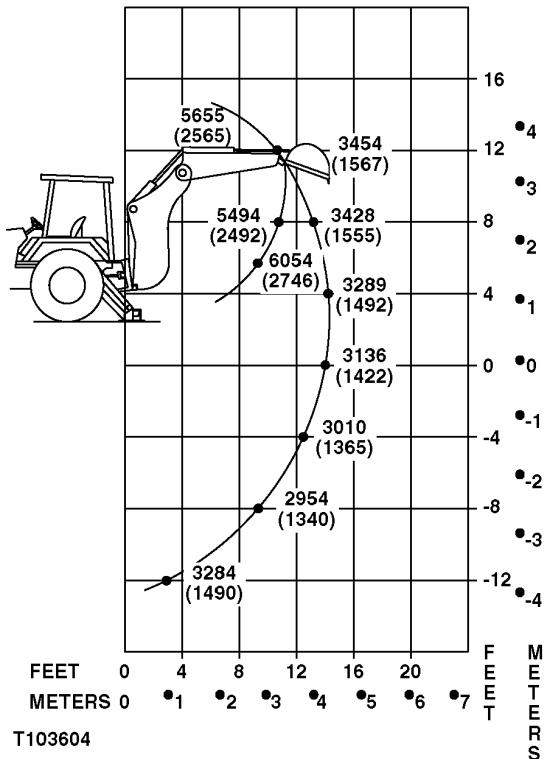

| Item | Measurement | Specification |
|---|-------------|------------------|
| Engine Coolant | Capacity | 16 L (17 qt) |
| Engine Oil (including filter) | Capacity | 12.8 L (13.5 qt) |
| Torque Converter and Transmission System | Capacity | 14 L (15 qt) |
| Rear Axle (S.N. —851673) | Capacity | 13 L (14 qt) |
| Rear Axle (S.N. 851674—) | Capacity | 16 L (17 qt) |
| MFWD Front Axle Housing | Capacity | 6.5 L (7 qt) |
| MFWD Front Wheel Planetary Housing (each) | Capacity | 1 L (1.1 qt) |
| Fuel Tank | Capacity | 136 L (36 gal) |
| Hydraulic System Reservoir | Capacity | 37 L (39 qt) |

TX,115,BG332 -19-01NOV99-1/1

410E Backhoe Loader Lifting Capacities—Standard Dipperstick

Lifting capacity ratings are made with bucket hinge pin, loader bucket and stabilizers on firm, level ground. Lift capacities are hydraulically limited. Lifting capacities are 87 percent of the maximum lift over any point on the swing arc and do not exceed 75 percent of the tipping load. Angle between boom and ground is 65 degrees. Machine is equipped with 610 mm (24 in.) standard bucket, standard or extendible dipperstick, and standard equipment.

NOTE: Loader bucket on ground significantly improves side stability, therefore improving lift capacity to the side. Lift capacity over the rear is not affected.

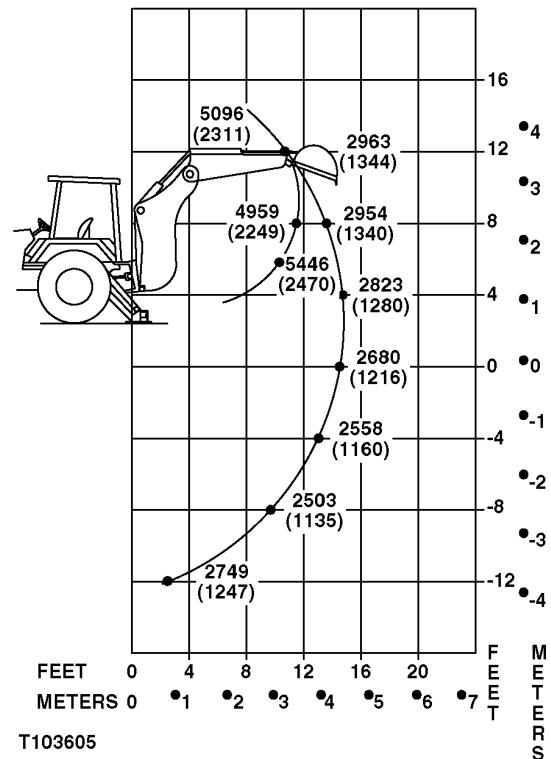

T105568-19-04DEC96

*Lift Capacity, Backhoe with Standard Dipperstick
Based on SAE J31 (Except with Loader Bucket on Ground)*

TX,110,BD2416 -19-06DEC96-1/1

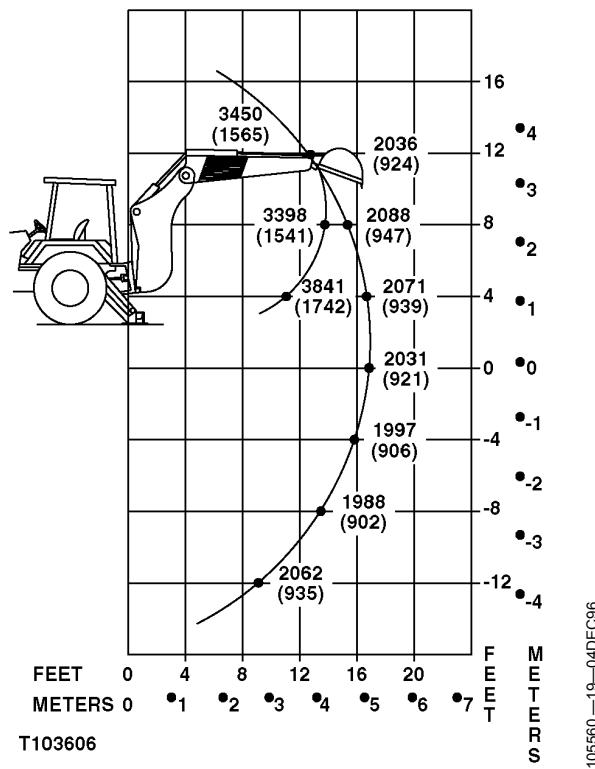

410E Backhoe Loader Lifting Capacities—Extendible Dipperstick (Retracted)

*Lift Capacity, Backhoe with Extendible Dipperstick, Retracted
Based on SAE J31 (Except with Loader Bucket on Ground)*

TX,110,BD2417 -19-06DEC96-1/1

410E Backhoe Loader Lifting Capacities—Extendible Dipperstick (Extended)

Lift Capacity, Backhoe with Extendible Dipperstick, Retracted
Based on SAE J31 (Except with Loader Bucket on Ground)

TX,110,BD2418 -19-06DEC96-1/1
