SAFETY	3
GENERAL INFORMATION	5
STANDARD TORQUE DATA FOR CAP SCREWS AND NUTS	6

SAFETY

 This symbol means **ATTENTION! BECOME ALERT! YOUR SAFETY IS INVOLVED.** The message that follows the symbol contains important information about safety. Carefully read the message. Make sure you fully understand the causes of possible injury or death. SB001

To prevent injury always follow the Warning, Caution and Danger notes in this section and throughout the manual.

Put the warning tag shown below on the key for the keyswitch when servicing or repairing the machine. One warning tag is supplied with each machine. Additional tags Part Number 331-4614 are available from your service parts supplier.

1001-01

 **WARNING:** Read the operator's manual to familiarize yourself with the correct control functions. 46-27

 **WARNING:** Operate the machine and equipment controls from the seat position only. Any other method could result in serious injury. 48-55

 **WARNING:** This is a one man machine, no riders allowed. 35-8

 **WARNING:** Before starting engine, study Operator's Manual safety messages. Read all safety signs on machine. Clear the area of other persons. Learn and practice safe use of controls before operating. It is your responsibility to understand and follow manufacturers instructions on machine operation, service and to observe pertinent laws and regulations. Operator's and Service Manuals may be obtained from your Case dealer. SA055

 **WARNING:** If you wear clothing that is too loose or do not use the correct safety equipment for your job, you can be injured. Always wear clothing that will not catch on objects. Extra safety equipment that can be required includes hard hat, safety shoes, ear protection, eye or face protection, heavy gloves and reflector clothing. 45-3A

 **WARNING:** When working in the area of the fan belt with the engine running, avoid loose clothing if possible, and use extreme caution. 35-4

 **WARNING:** When doing checks and tests on the equipment hydraulics, follow the procedures as they are written. **DO NOT** change the procedure. 47-44

 **WARNING:** When putting the hydraulic cylinders on this machine through the necessary cycles to check operation or to remove air from a circuit, make sure all people are out of the way. 47-45

WARNING: Use insulated gloves or mittens when working with hot parts. 47-41A

CAUTION: Lower all attachments to the ground or use stands to safely support the attachments before you do any maintenance or service. 49-11

CAUTION: Pin sized and smaller streams of hydraulic oil under pressure can penetrate the skin and result in serious infection. If hydraulic oil under pressure does penetrate the skin, seek medical treatment immediately. Maintain all hoses and tubes in good condition. Make sure all connections are tight. Make a replacement of any tube or hose that is damaged or thought to be damaged. **DO NOT** use your hand to check for leaks, use a piece of cardboard or wood. 40-6A

CAUTION: When removing hardened pins such as a pivot pin, or a hardened shaft, use a soft head (brass or bronze) hammer or use a driver made from brass or bronze and a steel head hammer. 46-17

CAUTION: When using a hammer to remove and install pivot pins or separate parts using compressed air or using a grinder, wear eye protection that completely encloses the eyes (approved goggles or other approved eye protectors). 46-13

CAUTION: Use suitable floor (service) jacks or chain hoist to raise wheels or tracks off the floor. Always block machine in place with suitable safety stands. 40-7A

CAUTION: When servicing or repairing the machine, keep the shop floor and operator's compartment and steps free of oil, water, grease, tools, etc. Use an oil absorbing material and/or shop cloths as required. Use safe practices at all times. 40-8

CAUTION: Some components of this machine are very heavy. Use suitable lifting equipment or additional help as instructed in this Service Manual. 40-10

DANGER: Engine exhaust fumes can cause death. If it is necessary to start the engine in a closed place, remove the exhaust fumes from the area with an exhaust pipe extension. Open the doors and get outside air into the area. 48-56

WARNING: When the battery electrolyte is frozen, the battery can explode if (1), you try to charge the battery, or (2), you try to jump start and run the engine. To prevent the battery electrolyte from freezing, try to keep the battery at full charge. If you do not follow these instructions, you or others in the area can be injured. SA033

GENERAL INFORMATION

CLEANING

Clean all metal parts except bearings, in a suitable cleaning solvent or by steam cleaning. Do not use caustic soda for steam cleaning. After cleaning, dry and put oil on all parts. Clean oil passages with compressed air. Clean bearings in a suitable cleaning solvent, dry the bearings completely and put oil on the bearings.

INSPECTION

Check all parts when the parts are disassembled. Replace all parts that have wear or damage. Small scoring or grooves can be removed with a hone or crocus cloth. Complete a visual inspection for indications of wear, pitting and the replacement of parts necessary to prevent early failures.

BEARINGS

Check bearings for easy action. If bearings have a loose fit or rough action replace the bearing. Wash bearings with a suitable cleaning solvent and permit to air dry. **DO NOT DRY BEARINGS WITH COMPRESSED AIR.**

NEEDLE BEARINGS

Before you press needle bearings in a bore always remove any metal protrusions in the bore or edge of the bore. Before you press bearings into position put petroleum jelly on the inside and outside diameter of the bearings.

GEARS

Check all gears for wear and damage. Replace gears that have wear or damage.

OIL SEALS, O-RINGS AND GASKETS

Always install new oil seals, O-rings and gaskets. Put petroleum jelly on seals and O-rings.

SHAFTS

Check all shafts that have wear or damage. Check the bearing and oil seal surfaces of the shafts for damage.

SERVICE PARTS

Always install genuine Case service parts. When ordering refer to the Parts Catalog for the correct part number of the genuine Case replacement items. Failures due to the use of other than genuine Case replacement parts are not covered by warranty.

LUBRICATION

Only use the oils and lubricants specified in the Operator's or Service Manuals. Failures due to the use of non-specified oils and lubricants are not covered by warranty.

STANDARD TORQUE DATA FOR CAP SCREWS AND NUTS

TIGHTENING OF CAP SCREWS, NUTS

Tighten alternately so that tightening torque can be applied evenly. The numbers in the figure below indicate the order of tightening.

1001-02

Apply engine oil to the thread portion of the cap screw so that uniform tightening torque is obtained.

The cap screws and nuts that cannot be inspected externally or those as indicated in the assembly/installation sections should be safetied with lockwire, cotter pin or bent washer.

1001-03

Cap screws which have had Loctite used (white residue remains after removal) should be cleaned with light oil or suitable cleaning solvent and dried. Apply 2-3 drops of Loctite to the thread portion of the cap screw and then tighten.

TORQUE TABLE

Tighten cap screws and nuts according to the table below if there are no other special instructions.

Cap Screw Name Size (Size)			M6	M8	M10	M12	M14	M16	M18	M20
Cap Screw	Spanner	[mm]	10	13	17	19	22	24	27	30
		[in.]	0.39	0.51	0.67	0.75	0.87	0.95	1.06	1.18

Engine Serial Number _____

GENERAL SPECIFICATIONS

Capacities

Engine Crank Case Capacity	29 liters	7.7 US gallons
Engine Cooling System	49 liters	13 US gallons
Fuel Tank	650 liters	172 US gallons
Hydraulic Oil Tank Capacity	210 liters	55.5 US gallons
Total Hydraulic System Capacity	450 liters	119 US gallons
Final Drive Case Capacity	7 liters	1.8 US gallons
Swing Drive Case Capacity	21 liters	5.5 US gallons
Track Front Idlers	960 to 980 cc	31.7 to 32.3 oz
Track Lower Rollers	530 to 540 cc	17.5 to 17.8 oz
Track Upper Roller	690 to 700 cc	22.8 to 23.1 oz

NOTE: These capacities are only a guide to the quantities. Always use the dipstick, sight gauges or level plug to make sure that fluid levels are correct.

Drawbar Pull

Drawbar Pull	32195 kg	70989 lb
--------------------	----------	----------

Drive Speed

Drive Speed: High	5.0 km/h	3.1 mph
Drive Speed: Middle	3.1 km/h	1.9 mph
Drive Speed: Low	2.2 km/h	1.4 mph

Electrical System

Type of System	24 volts negative ground
Alternator	
Manufacturer	Mitsubishi Electric Corp.
Output	40 amperes
Batteries	
Number of batteries required	2
Voltage of each battery	12 volts
Reserve capacity	160 minutes
Cold cranking capacity at -17°C (0°F)	800 amperes
Load for capacity (load) test	400 amperes
Starter Motor	
Manufacturer	Mitsubishi Electric Corp.
Voltage	24 volts

Fluids and Lubricants

- Batteries..... add drinking or distilled water
- Engine Coolant Solution..... refer to page 12
- Engine Lubrication..... refer to page 12
- Fuel..... refer to entry on page 5
- Hydraulic System.....refer to the following Hydraulic Fluid Chart
- Final Drive Lubricant.....API GL-4, SAE 90
- Swing Drive Case Lubricant.....API GL-4, SAE 90
- Track Roller and Front Idler Lubricant..... Case No. 1 Single Grade engine oil SAE 30
- Turntable Ring Gear Lubricant..... No. 2 EP lithium grease
- Grease Fitting Lubricant..... No. 2 EP lithium grease

Use only hydraulic oils meeting Case specifications or equivalent AW (anti-wear) hydraulic oils.

JS01435A

NOTE: Case specification MS-1210 TCH Fluid is used in place of ISO VG 32 (-5 to +65 F) and ISO VG 46 (+10 to +90 F).

Case specifications MS-1230 Grade NT or Grade LT is used in place of SO VG 32 (-5 to +65 F), ISO VG 46 (+10 to +90 F), ISO VG 100 (+30 to +115 F), and MS-1210 TCH.

Hydraulic Fluid Chart

Fuel

Use Number Two Diesel fuel having a grade of ASTM D 975-Grade 2-D.

Hydraulic System

Hydraulic Pump

Uchida A8V172ESBR6, 201F2-995-0 (KTJ1172)

ENGINE COOLING AND LUBRICATION SPECIFICATIONS

Engine Cooling System

Coolant Solution 45% Water and 55% Ethylene Glycol

IMPORTANT: When using ethylene glycol solutions, always have a minimum of 55% ethylene glycol in the system. Do not put more than 55% ethylene glycol in the cooling system unless the ambient air temperature will be less than -37°C (-34°F). If the air temperature is less than -37°C (-34°F), add additional ethylene glycol according to the manufacturer's instructions.

Thermostat Starts to open at 83°C (181°F)
Fully open at 95°C (203°F)

Radiator Cap..... 0.48 Bar (7 psi)

Engine Lubrication

Engine Oil Type

Case No. 1 engine oil is recommended for use in the Case engine. Case engine oil will lubricate the engine under all operating conditions. If Case No. 1 Multi-Viscosity engine oil is not available, Case No. 1 Single Grade engine oil can be used.

If Case No. 1 Multi-Viscosity or Single Grade engine oil is not available, use only oil meeting API engine oil service category CD.

See the chart below for recommended viscosity at ambient air temperature ranges.

NOTE: DO NOT put performance additives or other oil additive products into the engine crankcase.

Engine Lubrication Oil Viscosity/Temperature Ranges

NOTE: Use of an engine oil pan heater or an engine coolant heater is required when the operating temperatures (shown in the chart on the left) are in the cross-hatched area.

42 inch (1067 mm)	4	3125 lbs (1420 kg)	1.85 yd ³ (1.41 m ³)
48 inch (1219 mm)	5	3320 lbs (1509 kg)	2.15 yd ³ (1.64 m ³)
54 inch (1372 mm)	5	3720 lbs (1691 kg)	2.45 yd ³ (1.87 m ³)

NOTE: 6 inch (152 mm) side cutter blades are available for the above buckets. The side cutter blades add 6 inches (152 mm) to the width of each bucket.

GENERAL ENGINE SPECIFICATIONS

General

Make and Model	Mitsubishi 6D22TC	
Type	6 cylinder, turbocharged 4 stroke cycle	
Horsepower.....	289 hp at 2000 rpm	215 kw at 2000 rpm
Firing Order.....	1, 5, 3, 6, 2, 4	
Bore and Stroke	130 mm x 140 mm	5.12 in. x 5.51 in.
Piston Displacement.....	11.15 liters	680 in ³
Compression Ratio	16 to 1	
Engine Speeds		
Full Throttle - Full Load.....	1650 rpm	
Engine Idle Speed	890 rpm	

Pistons and Connecting Rods

Rings per Piston.....	3
Number of Compression Rings	2
Number of Oil Rings	1

Main Bearings

Number of Bearings.....	7
Type of Bearings	Replaceable

Engine Lubricating System

Type of System.....	Pressure and Spray Lubrication	
Oil Pressure (when engine warm and operating at rated speed)	2.97 to 4.89 Bar	43 to 71 psi
Oil Pump	Gear Type	
Oil Filters		
Quantity	2	
Type	Full Flow and Bypass	
Oil Capacity		
(with filter change)	29.3 liters	31 US quarts
(without filter change)	24.8 liters	26 US quarts

9060B TRANSPORTING DIMENSIONS

JS01436A

A	Overall height of machine with attachment on the ground	
	with 11 ft (3.36 m) arm	11 ft 3 in. (3.43 m)
	with 13 ft 1 in. (4.0 m) arm	11 ft 4 in. (3.46 m)
	with 17 ft 8 in. (5.40 m) arm	15 ft 8 in. (4.78 m)
B	Overall length of machine in TRANSPORT position	
	with 11 ft (3.36 m) arm	39 ft 2 in. (11.95 m)
	with 13 ft 1 in. (4.0 m) arm	39 ft 3 in. (11.96 m)
	with 17 ft 8 in. (5.40 m) arm	38 ft 10 in. (11.84 m)
C	Length from swing pivot to end of arm - arm in TRANSPORT position	
	with 11 ft (3.36 m) arm	27 ft 6 in. (8.38 m)
	with 13 ft 1 in. (4.0 m) arm	27 ft 6 in. (8.38 m)
	with 17 ft 8 in. (5.40 m) arm	27 ft 2 in. (8.28 m)
D	Tail swing radius	11 ft 9 in. (3.57 m)
E	Length between centerlines of idler and drive sprocket	13 ft 11 in. (4.26 m)
F	Track overall length	17 ft 4 in. (5.28 m)
G	Clearance height of upper structure	4 ft 5 in. (1.35 m)
H	Overall width of upper structure	9 ft 10 in. (2.99 m)
J	Overall width of upper structure, including catwalk	11 ft 10 in. (3.6 m)
K	Width of each catwalk	12 in. (305 mm)
L	Height to top of cab	10 ft 10 in. (3.30 m)
M	Minimum ground clearance	1 ft 10 in. (550 mm)
N	Track overall width - with 35.4 in. (900 mm) shoes	12 ft (3.65 m)
P	Track gauge	9 ft (2.74 m)
R	Standard track plate width	35.8 in. (910 mm)

ENGINE

TABLE OF CONTENTS

SPECIFICATIONS	2
SPECIAL TORQUES	2
ENGINE	3
Removal	3
Installation	9

SPECIFICATIONS

Weight of the engine2249 pounds (1020 kg)

SPECIAL TORQUES

Cap screws that hold the engine mounts to the frame215 to 245 lb-ft (290 to 335 Nm)
(Apply Loctite 262 on the threads of the cap screws)

ENGINE

Removal

NOTE: Make sure engine is cool before starting removal procedures.

STEP 1

Remove the hydraulic pump (see Section 8002).

STEP 2

Remove the radiator, oil cooler, and the cooling system reservoir (see Section 2001).

STEP 3

Open the left side access doors. Disconnect the negative battery cable from the battery.

STEP 4

Remove the bottom right rear access panel. Remove the five cap screws securing the rear center hinged panel below the engine. Swing the panel down for access to the engine two left mounts.

STEP 5

Tag and disconnect the two wiring harness connectors and the ground wire from the alternator. Tag and disconnect the wiring harness wire connected to the alternator output terminal.

STEP 6

Tag and disconnect the wiring harness wire from the air heater terminal.

STEP 7

Cut, remove, and discard the three tie straps holding the wiring harness and the radiator overflow hose to the radiator hose.

STEP 8

Loosen the clamp securing the air inlet tube to the turbocharger. Disconnect the air inlet tube.

STEP 9

Remove the screw, flat washer, and lock washer and remove the cover. Tag and disconnect the wiring harness blue wire from the starter assembly terminal. Tag and disconnect the wiring harness white wire and the cable from the starter assembly.

STEP 10

Remove the nut and lock washer. Disconnect the ground cable from the engine.
