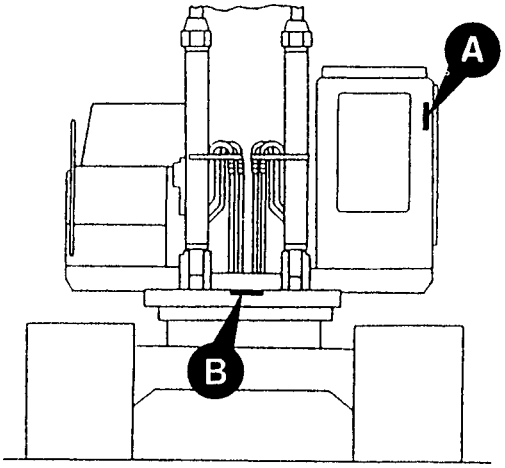
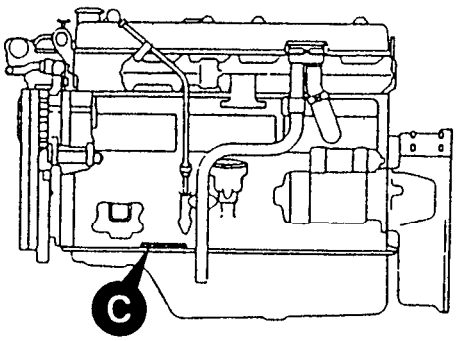
Contents

Page No.

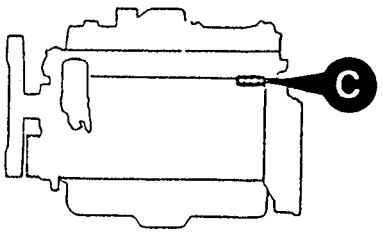
Your machine has a Data Plate, located to the rear left, inside the cab as shown **A**. The machine serial number is inscribed at **B** and the engine number at **C**.

If the engine is replaced by a new one, the data plate serial number will be wrong. Either stamp the new number on the plate or stamp out the old one. This will prevent the wrong number being quoted when you order replacement parts.

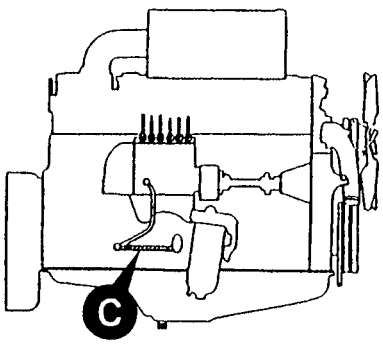




JS200LC, JS24LC



JS300LC



JS450LC

Torque Settings

Note 1: The figures quoted are for non-plated fasteners and are to be used only when there is no torque setting specified in the relevant procedure in this service manual.

Note 2: The 4T grade settings DO NOT APPLY to fasteners used on the engine. If any 4T specification fasteners are found on the engine these must be tightened to the figure quoted in the relevant engine manual.

Bolt Size	Strength Grade of Bolt or Stud								
	4T			**8.8**			**10.9**

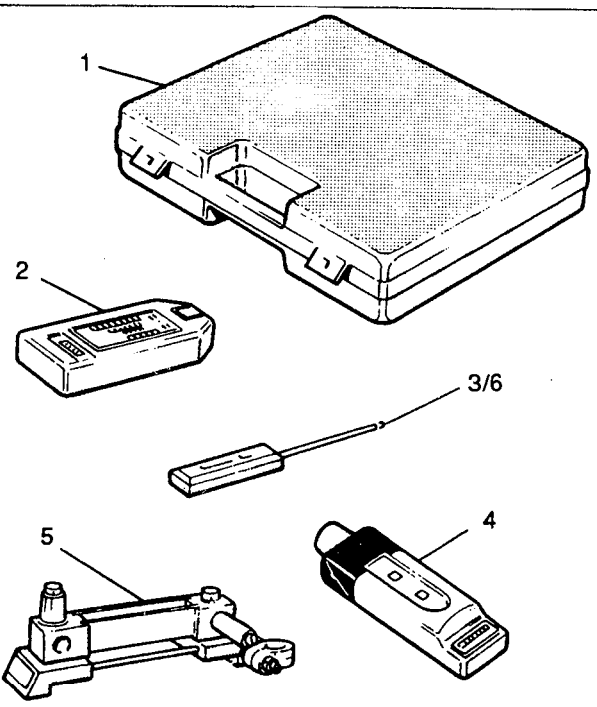
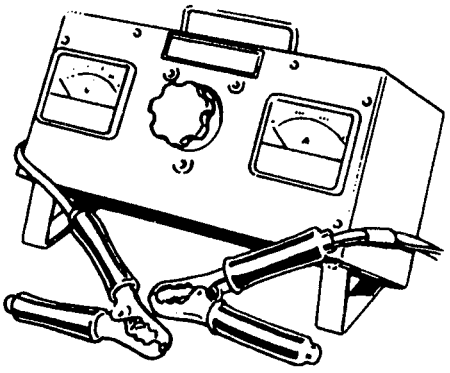
Service Tools

SECTION C - ELECTRICS



Electrical Test Equipment

1	892/00283	Tool Kit Case
2	892/00281	AVO Meter
3	892/00286	Surface Temperature Probe
4	892/00284	Microtach Digital Tachometer
5	892/00282	Shunt - open type
6	892/00285	Hydraulic Oil Temperature Probe
7	892/00298	Fluke 85 Multimeter



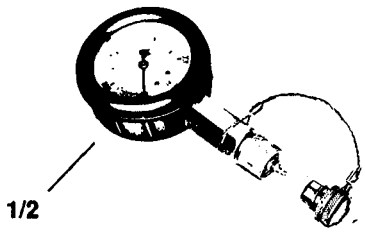
892/00121 High Rate Discharge Tester (400 Amps) for testing battery discharge condition

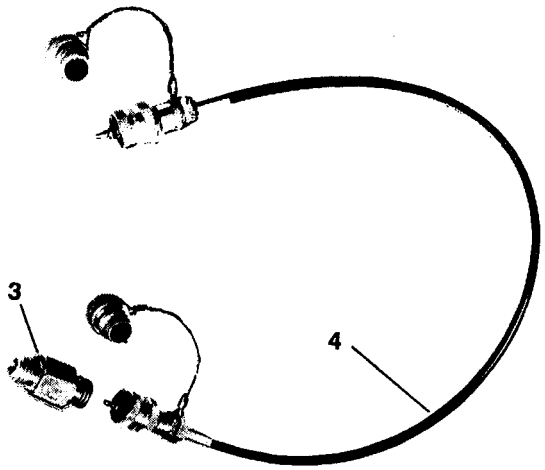
Service Tools (continued)

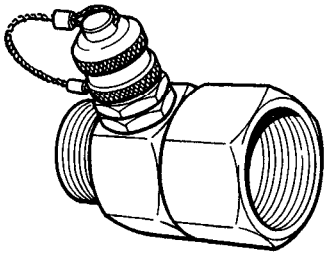
SECTION E - HYDRAULICS

Hydraulic Pressure Test Gauges and Connections

1	892/00279	Pressure Gauge 0-400 bar (0-6000 lbf/in²)
2	892/00346	Pressure Gauge 0-70 bar (0-1000 lbf/in²)
3	892/00347	Connector
4	892/00254	Hose

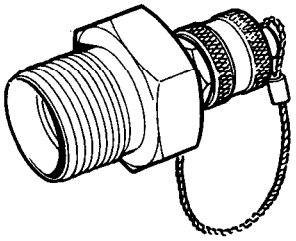






Pressure Test 'T' Adapters

892/00262	1/4 in M BSP x 1/4 in F BSP x Test Point
816/55038	3/8 in M BSP x 3/8 in F BSP x Test Point
816/55040	1/2 in M BSP x 1/2 in F BSP x Test Point
892/00263	5/8 in M BSP x 5/8 in F BSP x Test Point
892/00264	3/4 in M BSP x 3/4 in F BSP x Test Point
892/00265	1 in M BSP x 1 in F BSP x Test Point
892/00266	1,1/4 in M BSP x 1,1/4 in F BSP x Test Point
892/00267	1,1/2 in M BSP x 1,1/2 in F BSP x Test Point

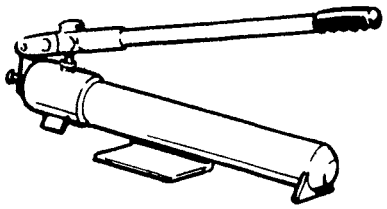


Pressure Test Adapters

892/00255	1/4 in BSP x Test Point
892/00256	3/8 in BSP x Test Point
892/00257	1/2 in BSP x Test Point
892/00258	5/8 in BSP x Test Point
816/15118	3/4 in BSP x Test Point
892/00259	1 in BSP x Test Point
892/00260	1.1/4 in BSP x Test Point
892/00261	5/8 in UNF x Test Point

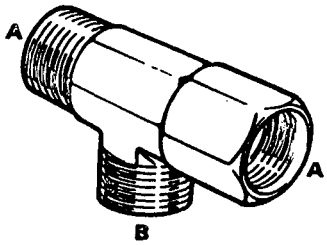
Service Tools (continued)

SECTION E - HYDRAULICS

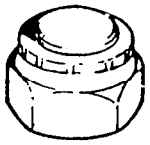


Hand Pump Equipment

892/00223	Hand Pump
892/00137	Micro-bore Hose 1/4 in BSP x 5 metres
892/00274	Adapter 1/4 in M BSP x 3/8 in M BSP Taper
892/00262	1/4 in M BSP x 1/4 in F BSP x Test Point
892/00706	Test Probe
892/00278	Gauge 0 - 40 bar (0 - 600 lbf/in^2)
892/00279	Gauge 0 - 400 bar (0 - 6000 lbf/in^2)
892/00280	Gauge 0 - 600 bar (0 - 8500 lbf/in^2)

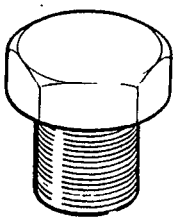


816/50005	1/2 in. BSP (A) x 1/2 in. BSP (B)
816/60096	3/4 in. BSP (A) x 3/4 in. BSP (B)
816/00018	1 in. BSP (A) x 1 in. BSP (B)



Female Cone Blanking Plug

892/00055	1/4 in. BSP
892/00056	3/8 in. BSP
892/00057	1/2 in. BSP
892/00058	5/8 in. BSP
892/00059	3/4 in. BSP
892/00060	1 in. BSP



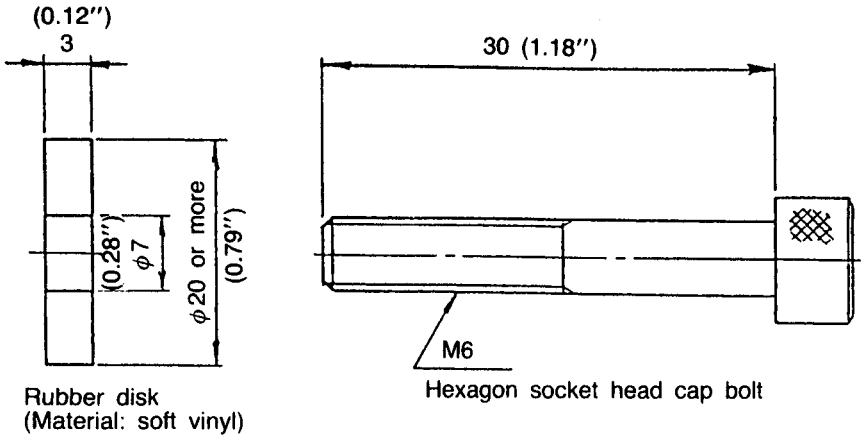
Male Cone Blanking Cap

816/00294	1/4 in. BSP
816/00189	3/8 in. BSP
816/00190	1/2 in. BSP
816/00197	5/8 in. BSP
816/00196	3/4 in. BSP
816/00193	1 in. BSP

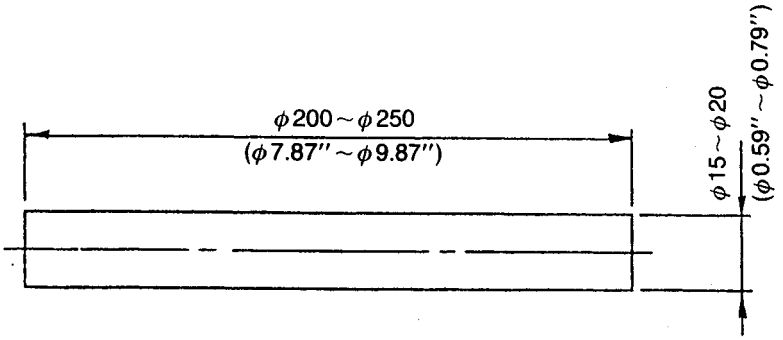
Service Tools (continued)

SECTION E - HYDRAULICS

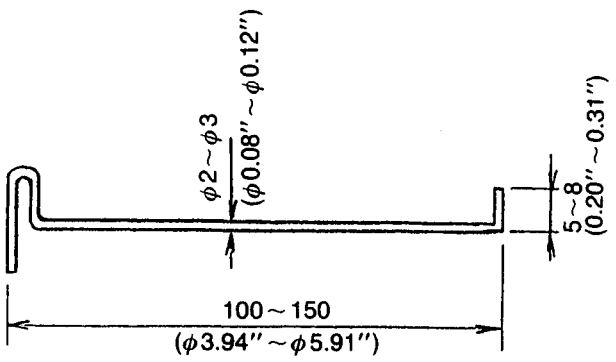
Hydraulic Pump - JS 200LC, 300LC and 450LC



Rubber Disk Assembly



Round Pipe or Bar

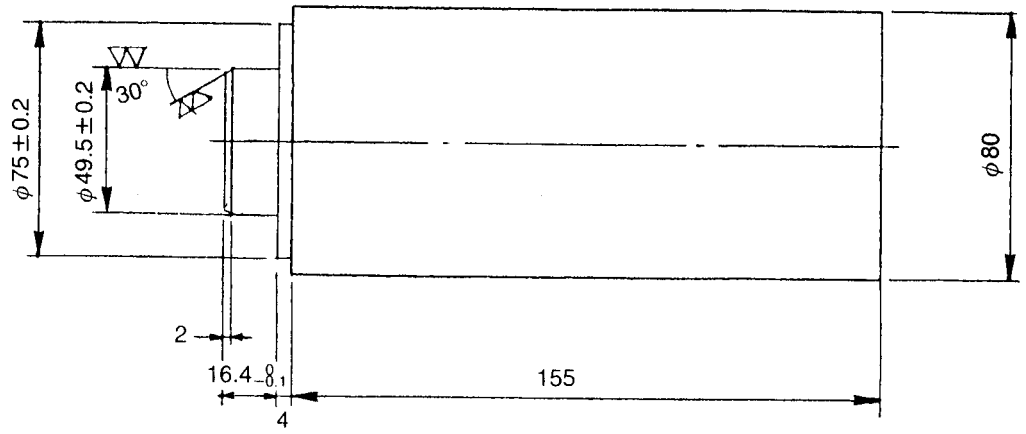


L- Shaped Bar

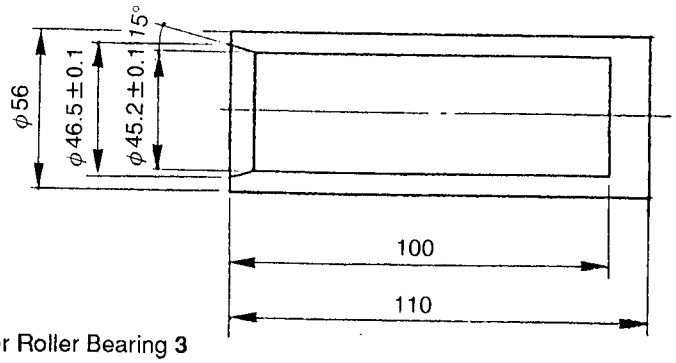
Service Tools (continued)

SECTION E - HYDRAULICS

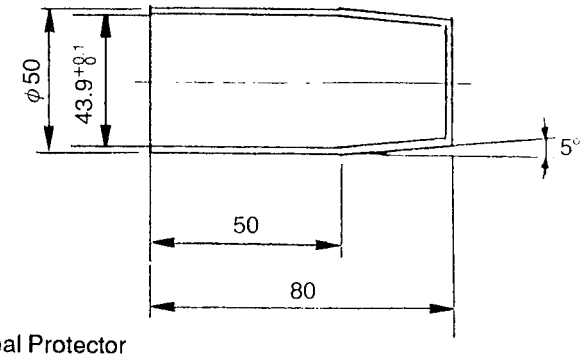
Swing Motor Unit - JS 200LC



Seal Fitting Tool (Oil Seal **2**)

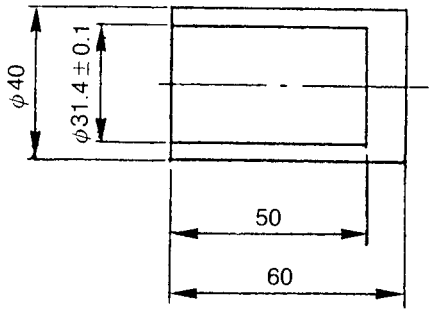


Fitting Tool for Inner Ring of Taper Roller Bearing **3**



Seal Protector

Heat polyvinyl tube in hot water and form to required shape.

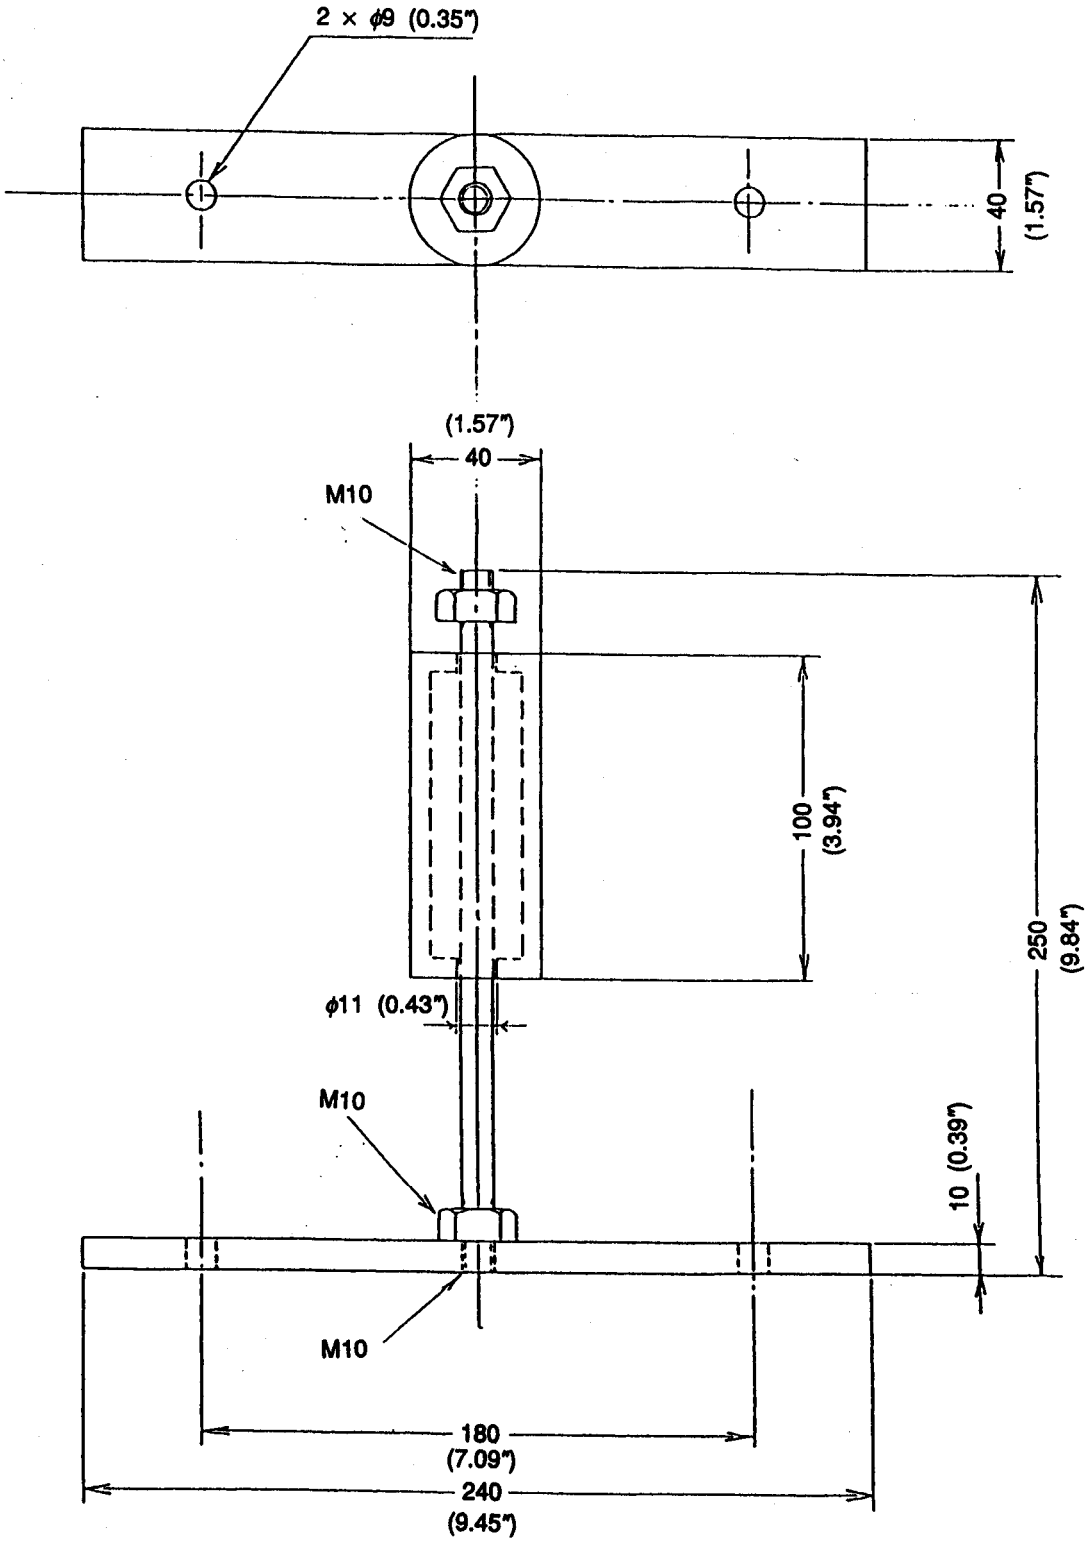


Fitting Tool for Inner Ring **1**

Service Tools (continued)

SECTION E - HYDRAULICS

Swing Motor Unit - JS 300LC



Puller for Brake Piston

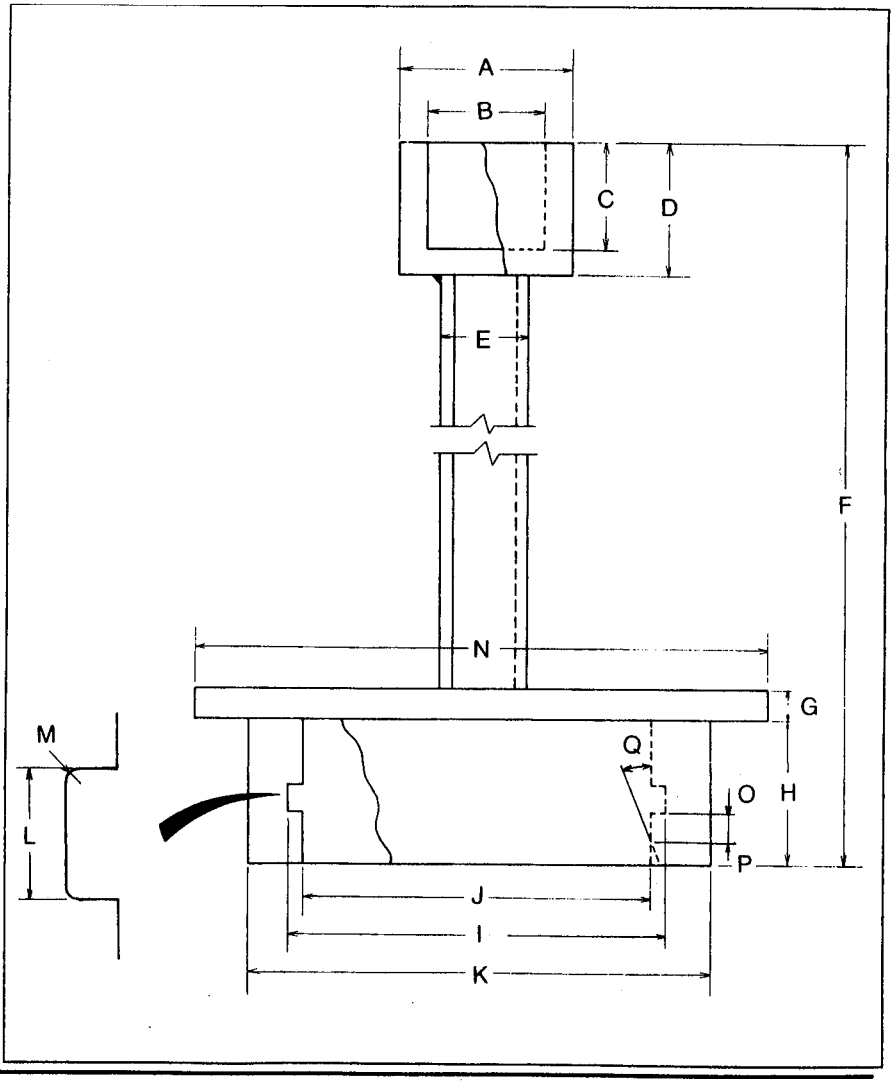
Stud is threaded M10 on both ends for 20 mm (0.8 in) and fitted with two M10 nuts.

Service Tools (continued)

SECTION E - HYDRAULICS

Hydraulic Tank - JS 200LC and 300LC

	JS200LC	JS300LC
A	Dia. 40mm (1.57in)	
B	Dia. 26mm (1.02in)	
C	40mm (1.57in)	
D	50mm (1.97in)	
E	Dia. 10mm (0.39in)	
F	600mm (23.6in)	650mm (25.6in)
G	9mm (0.35in)	
H	24mm (0.94in)	30mm (1.18in)
I	Dia. 95mm $^{+0}_{-0.1}$ (3.74in $^{+0}_{-0.004}$)	
J	Dia. 90mm $^{+0}_{-0.1}$ (3.54in $^{+0}_{-0.004}$)	
K	110 mm (4.33 in)	
L	4.1mm (0.16in)	
M	Radius 0.7mm (0.028in)	
N	130mm (5.12in)	
O	4.0mm (0.16in)	-
P	3.0mm (0.118in)	-
Q	15°	-
O-ring	G90	

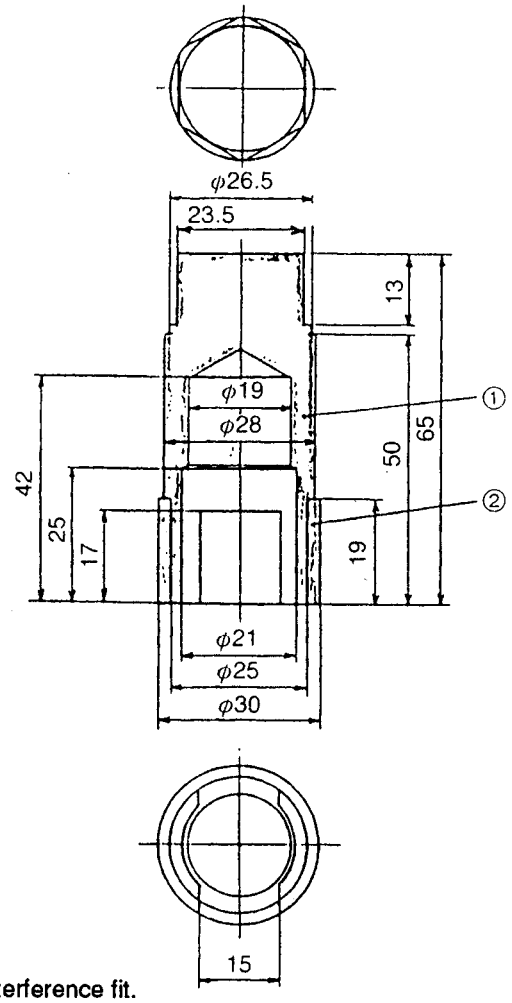


Blank for Suction Strainer

Service Tools (continued)

SECTION E - HYDRAULICS

Servo Hand Control Valve - JS 200LC, 240LC and 450LC



Joint Removal Tool

Items 1 and 2 are assembled with an interference fit.

Service Tools (continued)

SECTION E - HYDRAULICS

Rotary Coupling - JS 240LC, 300LC and 450LC

	JS 240LC	JS 300LC	JS 450LC
A	10mm (0.4in)	12mm (0.5in)	14mm (0.55in)
B	M12~M20	M12~M20	M16~M20
C	M12~M20	M12~M20	M16~M20
D	300mm (11.8in)~400mm (15.75in)	300mm (11.8in)~400mm (15.75in)	350mm (13.8in)~400mm (15.75in)

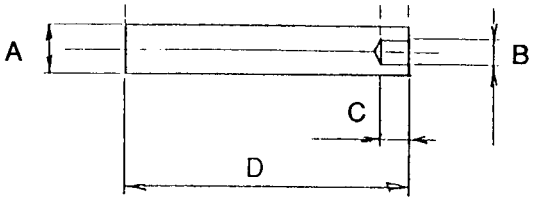
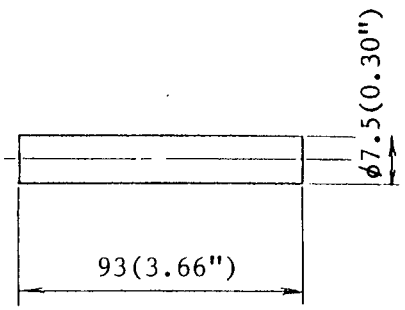
D	13mm(0.51in)	13mm(0.51in)
E	93mm(3.66in)	93mm(3.66in)



Spring Pin Knocking Jig

	JS 200LC	JS 300LC
A	7.5mm(0.3in)	7.5mm(0.3in)
B	4.5mm(0.18in)	5.5mm(0.22in)
C	5mm(0.2in)	5mm(0.2in)
D	93mm(3.66in)	93mm(3.66in)

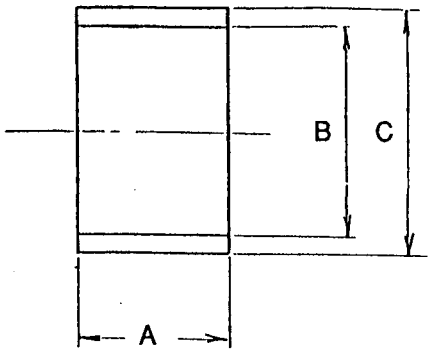


Spring Pin Knocking Jig

Service Tools (continued)

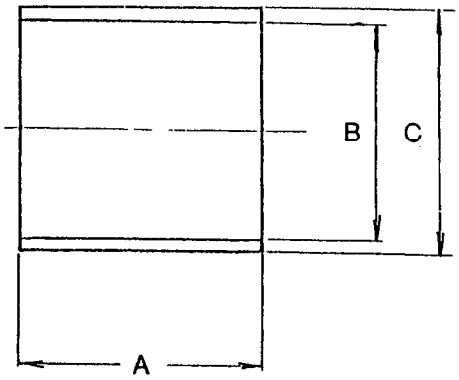
SECTION F - TRANSMISSION

Track Gearbox - JS 200LC and JS 300LC



Angular Bearing Outer-race Press-fitting Jig

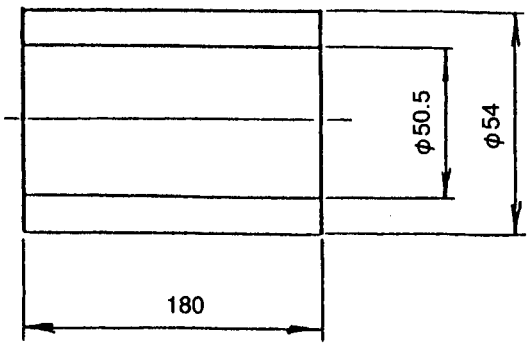
	JS 200LC	JS 300LC
A	50mm (1.97in)	50mm (1.97in)
B	273mm (10.75in)	333mm (13.11in)
C	309.6mm (12.19in)	369.6mm (14.55in)



Angular Bearing Inner-race S/A Press-fitting Jig

	JS 200LC	JS 300LC
A	80mm (3.15in)	80mm (3.15in)
B	240mm (9.47in)	279.5mm (11.0in)
C	258mm (10.16in)	297mm (11.69in)

Track Gearbox - JS 300LC only



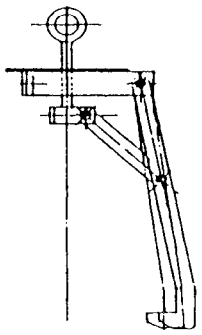
Roller Bearing Inner-race Disassembling Jig

Service Tools (continued)

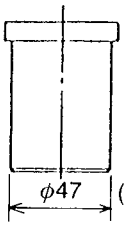
SECTION F - TRANSMISSION

Track Gearbox - JS 240LC

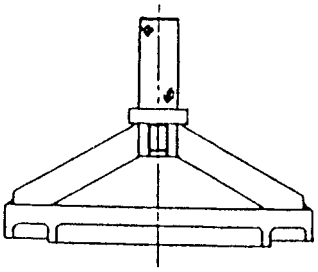
Note: Dimensions of the some tools on this page were not available in time for publication.



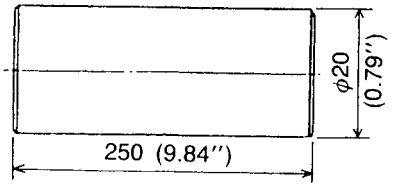
Lifting Device for Planet Carrier



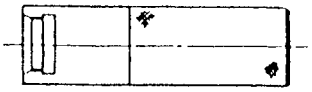
Tool for Compressing Spring in Cylinder Block (Holder 1)



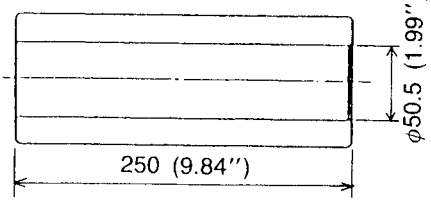
Press-fitting Jig for Main Bearings



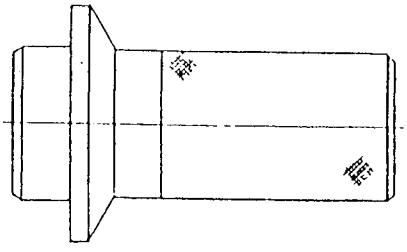
Aluminium Bar



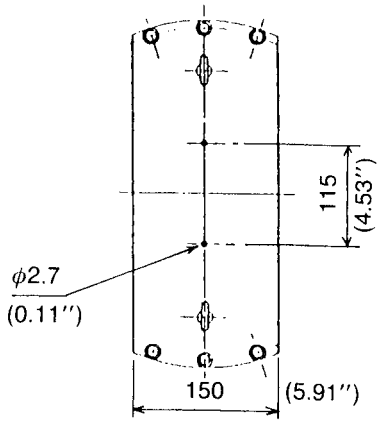
Guide Remover



Support Tube for Pressing Inner-race from Shaft (Holder 2)



Oil Seal Force Fitting Jig



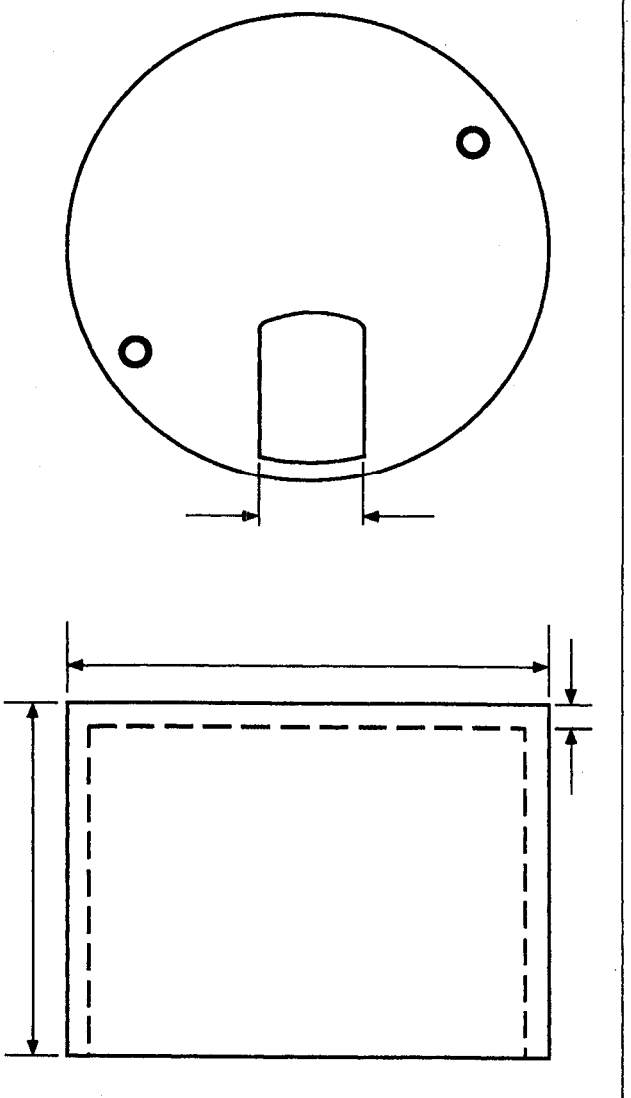
Clearance Measuring Tool for Thrust Bearing

Service Tools (continued)

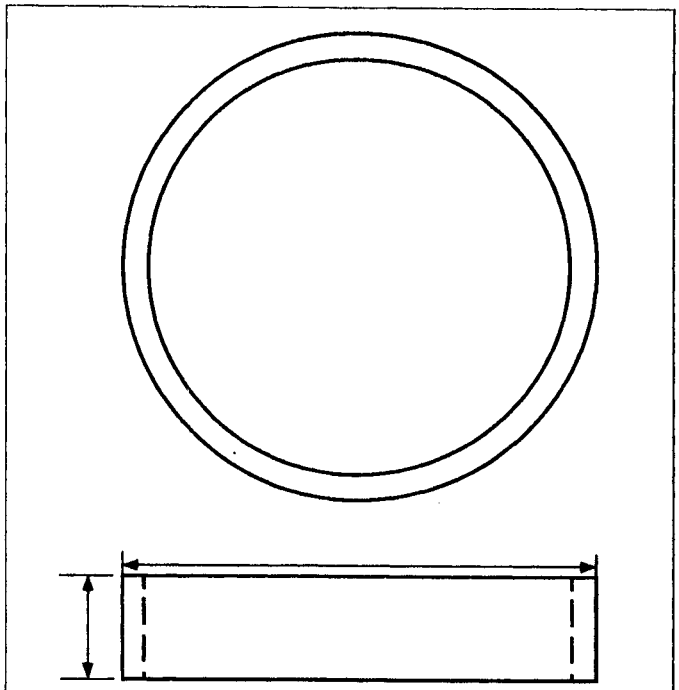
SECTION F - TRANSMISSION

Track Gearbox - JS 450

Note: Dimensions of the tools shown on this page were not available in time for publication.



Bearing Pre-load Setting Jig



Measuring Jig

Sealing and Retaining Compounds

JCB Multi-Gasket	A medium strength sealant suitable for all sizes of gasket flanges, and for hydraulic fittings of 25-65 mm diameter.	4102/1201	
JCB High Strength Threadlocker	A high strength locking fluid for use with threaded components.	4102/0502	
JCB High Strength Retainer	For all retaining parts which are unlikely to be dismantled.	4101/0602	
JCB Lock and Seal	A medium strength locking fluid for sealing and retaining nuts, bolts, and screws up to 50 mm diameter, and for hydraulic fittings up to 25 mm diameter.	4101/0202	
Loctite Activator N	A cleaning primer which speeds the curing rate of anaerobic products.	4104/0101 4104/0102	Aerosol Bottle
JCB Cleaner and Degreaser	For degreasing components prior to use of anaerobic adhesives and sealants.	4104/1538	Aerosol
Loctite 262	A medium to high strength locking fluid.	4101/0502	

Contents	Page No.

In this publication and on the machine, there are safety notices. Each notice starts with a signal word. The signal word meanings are given below.

⚠ DANGER

Denotes an extreme hazard exists. If proper precautions are not taken, it is highly probable that the operator (or others) could be killed or seriously injured.

INT-1-2-1

⚠ WARNING

Denotes a hazard exists. If proper precautions are not taken, the operator (or others) could be killed or seriously injured.

INT-1-2-2

⚠ CAUTION

Denotes a reminder of safety practices. Failure to follow these safety practices could result in injury to the operator (or others) and possible damage to the machine.

INT-1-2-3

All construction and agricultural equipment can be hazardous. When a JCB Excavator is correctly operated and properly maintained, it is a safe machine to work with. But when it is carelessly operated or poorly maintained it can become a danger to you (the operator) and others.

Do not work with the machine until you are sure that you can control it.

Do not start any job until you are sure that you and those around you will be safe.

If you are unsure of anything, about the machine or the job, ask someone who knows. Do not assume anything.

Remember

BE CAREFUL
BE ALERT
BE SAFE

GEN-1-6

As well as the warnings in the following pages, specific warnings are given throughout the book. This section is designed to give a safety code for use of the machine generally and for operation and maintenance practices.

Note: This section includes a certain amount of operating safety information. But remember that whenever you drive the machine or operate its controls you are in effect a machine operator. Therefore you should read and understand the information given in the Operator Handbook before driving the machine or operating its controls.

General Safety

⚠ WARNING

Lifting Equipment

You can be injured if you use faulty lifting equipment. Make sure that lifting equipment is in good condition. Make sure that lifting tackle complies with all local regulations and is suitable for the job. Make sure that lifting equipment is strong enough for the job.

INT-1-3-7

⚠ WARNING

Clothing

You can be injured if you do not wear the proper clothing. Loose clothing can get caught in the machinery. Wear protective clothing to suit the job. Examples of protective clothing are: a hard hat, safety shoes, safety glasses, a well fitting overall, ear-protectors and industrial gloves. Keep cuffs fastened. Do not wear a necktie or scarf. Keep long hair restrained.

INT-1-3-6

⚠ WARNING

Care and Alertness

All the time you are working with or on the machine, take care and stay alert. Always be careful. Always be alert for hazards.

INT-1-3-5

⚠ WARNING

Raised Equipment

Raised equipment can fall and injure you. Do not walk or work under raised equipment unless safely supported.

13-1-1-6

⚠ DANGER

Before removing the boom from the machine, ensure that the counterweight is adequately supported as in certain ground conditions the machine could tip backwards. Never travel or transport the machine with the boom removed.

BF 6-3

Operating Safety

⚠ WARNING

Engine

The engine has rotating parts. Do not open the engine cover while the engine is running. Do not use the machine with the cover open.

INT-2-1-6

⚠ WARNING

Entering/Leaving

Always face the machine when entering and leaving the cab. Use the step(s) and handrails. Make sure the step(s), handrails and your boot soles are clean and dry. Do not jump from the machine. Do not use the machine controls as handholds, use the handrails.

INT-2-1-7

⚠ WARNING

Controls

You or others can be killed or seriously injured if you operate the controls levers from outside the cab. Operate the control levers only when you are correctly seated inside the cab.

INT-2-1-3

⚠ WARNING

Visibility

Accidents can be caused by working in poor visibility. Keep windows clean and use your lights to improve visibility. Do not operate the machine if you cannot see properly.

INT-2-1-11

⚠ WARNING

Machine Limits

Operating the machine beyond its design limits can damage the machine, it can also be dangerous. Do not operate the machine outside its limits. Do not try to upgrade the machine performance with unapproved modifications.

INT-2-1-4

⚠ WARNING

Exhaust Gases

Breathing the machine exhaust gases can harm and possibly kill you. Do not operate the machine in closed spaces without making sure there is good ventilation. If possible, fit an exhaust extension. If you begin to feel drowsy, stop the machine at once. Get out of the cab into fresh air.

INT-2-1-10

⚠ WARNING

Hazardous Atmospheres

This machine is designed for use in normal outdoor atmospheric conditions. It should not be used in an enclosed area without adequate ventilation. Do not use the machine in a potentially explosive atmosphere, i.e. combustible vapours, gas or dust, without first consulting your JCB Distributor.

INT-2-1-14

⚠ WARNING

Ramps and Trailers

Water, mud, ice, grease and oil on ramps or trailers can cause serious accidents. Make sure ramps and trailers are clean before driving onto them. Use extreme caution when driving onto ramps and trailers.

INT-2-2-6

⚠ WARNING

Communications

Bad communications can cause accidents. Keep people around you informed of what you will be doing. If you will be working with other people, make sure any hand signals that may be used are understood by everybody. Work sites can be noisy, do not rely on spoken commands.

INT-2-2-3

⚠ DANGER

Sparks

Explosions and fire can be caused by sparks from the exhaust or the electrical system. Do not use the machine in closed areas where there is flammable material, vapour or dust.

INT-2-2-10

⚠ WARNING

Controls

Keep the machine controls clean and dry. Your hands and feet could slide off slippery controls. If that happens you will lose control of the machine.

2-2-3-6

Maintenance Safety

⚠ WARNING

Soft Ground

A machine can sink into soft ground. Never work under a machine on soft ground.

INT-3-2-4

⚠ WARNING

Metal Splinters

You can be injured by flying metal splinters when driving metal pins in or out. Use a soft faced hammer or drift to remove and fit metal pins. Always wear safety glasses.

INT-3-1-3

⚠ WARNING

Communications

Bad communications can cause accidents. If two or more people are working on the machine, make sure each is aware of what the others are doing. Before starting the engine make sure the others are clear of the danger areas; examples of danger areas are: the rotating blades and belt on the engine, the attachments and linkages, and anywhere beneath or behind the machine. People can be killed or injured if these precautions are not taken.

INT-3-1-5

⚠ WARNING

Diesel Fuel

Diesel fuel is flammable; keep naked flames away from the machine. Do not smoke while refuelling the machine or working on the engine. Do not refuel with the engine running. There could be a fire and injury if you do not follow these precautions.

INT-3-2-2

⚠ WARNING

Petrol

Do not use petrol in this machine. Do not mix petrol with the diesel fuel; in storage tanks the petrol will rise to the top and form flammable vapours.

INT-3-1-6

⚠ WARNING

Oil

Oil is toxic. If you swallow any oil, do not induce vomiting, seek medical advice. Used engine oil contains harmful contaminants which can cause skin cancer. Do not handle used engine oil more than necessary. Always use barrier cream or wear gloves to prevent skin contact. Wash skin contaminated with oil thoroughly in warm soapy water. Do not use petrol, diesel fuel or paraffin to clean your skin.

INT-3-2-3

⚠ WARNING

Fires

If your machine is equipped with a fire extinguisher, make sure it is checked regularly. Keep it in the operator's cab until you need to use it.

Do not use water to put out a machine fire, you could spread an oil fire or get a shock from an electrical fire. Use carbon dioxide, dry chemical or foam extinguishers. Contact your nearest fire department as quickly as possible. Firefighters should use self-contained breathing apparatus.

INT-3-2-7/1

⚠ WARNING

Battery

A battery with frozen electrolyte can explode if it is used or charged. Do not use a machine with a frozen battery. To help prevent the battery from freezing, keep the battery fully charged.

INT-3-1-7

⚠ WARNING

Battery Gases

Batteries give off explosive gases. Keep flames and sparks away from the battery. Do not smoke close to the battery. Make sure there is good ventilation in closed areas where batteries are being used or charged. Do not check the battery charge by shorting the terminals with metal; use a hydrometer or voltmeter.

INT-3-1-8

⚠ WARNING

Battery Terminals

The machine is negatively earthed. Always connect the negative pole of the battery to earth.

When connecting the battery, connect the earth (-) lead last.

When disconnecting the battery, disconnect the earth (-) lead first.

INT-3-1-9

⚠ WARNING

Electrical Circuits

Understand the electrical circuit before connecting or disconnecting an electrical component. A wrong connection can cause injury and/or damage.

INT-3-1-4

⚠ CAUTION

Never use water or steam to clean inside the cab. The use of water or steam could damage the on-board computer and render the machine inoperable. Remove dirt using a brush or damp cloth.

8-3-4-8

Maintenance Safety (cont'd)

⚠ CAUTION
Arc Welding

Before carrying out any arc welding on the machine, completely remove the Control Computer to avoid damage to the circuits; also disconnect the alternator plug and battery leads.

When welding items to the mainframe make sure that the earth clamp is positioned on the mainframe and when welding to the undercarriage make sure that the earth clamp is positioned on the undercarriage. If you earth one and weld the other, you may cause severe damage to the slew ring.

Always connect the earth clamp to any other component being welded, i.e. boom or dipper, to avoid damage to pivot pins and bushes.
8-1-2-6/1

⚠ WARNING
Hydraulic Hoses

Damaged hoses can cause fatal accidents. Inspect the hoses regularly for:
Damaged end fittings
Chafed outer covers
Ballooned outer covers
Kinked or crushed hoses
Embedded armouring in outer covers
Displaced end fittings.
INT-3-3-2

⚠ WARNING

DO NOT remove the hydraulic tank filler cap or cover plate when the engine is running. The hydraulic system is under pressure. You or others could be injured. First stop the engine and then release the pressure.
8-3-4-4/1

⚠ WARNING
Hydraulic Pressure

Hydraulic fluid at system pressure can injure you. Before disconnecting or connecting hydraulic hoses, stop the engine and operate the controls to release pressure trapped in the hoses. Make sure the engine cannot be started while the hoses are open.
INT-3-1-11/1

⚠ WARNING
Hydraulic Fluid

Fine jets of hydraulic fluid at high pressure can penetrate the skin. Do not use your fingers to check for hydraulic fluid leaks. Do not put your face close to suspected leaks. Hold a piece of cardboard close to suspected leaks and then inspect the cardboard for signs of hydraulic fluid. If hydraulic fluid penetrates your skin, get medical help immediately.
INT-3-1-10/1

⚠ CAUTION
Rams

The efficiency of the rams will be affected if they are not kept free of solidified dirt. Clean dirt from around the rams regularly. When leaving or parking the machine, close all rams if possible to reduce the risk of weather corrosion.
INT-3-2-10

⚠ CAUTION
Cleaning

Cleaning metal parts with incorrect solvents can cause corrosion. Use only recommended cleaning agents and solvents.
INT-3-2-11

⚠ CAUTION
'O' rings, Seals and Gaskets

Badly fitted, damaged or rotted 'O' rings, seals and gaskets can cause leakages and possible accidents. Renew whenever disturbed unless otherwise instructed. Do not use Trichloroethane or paint thinners near 'O' rings and seals.
INT-3-2-12

⚠ WARNING
Hot Coolant

The cooling system is pressurised when the engine is hot. Hot coolant can spray out when you remove the radiator cap. Let the system cool before removing the radiator cap. To remove the cap; turn it to the first notch and let the system pressure escape, then remove the cap.
INT-3-2-9

Contents

Contents

Note: New engines DO NOT require a running-in period. The engine/machine should be used in a normal work cycle immediately; glazing of the piston cylinder bores, resulting in excessive oil consumption, could occur if the engine is gently run-in. Under no circumstances should the engine be allowed to idle for extended periods (e.g. warming-up without load).

Item	Fluids/ Lubricants	International Specification	Capacity

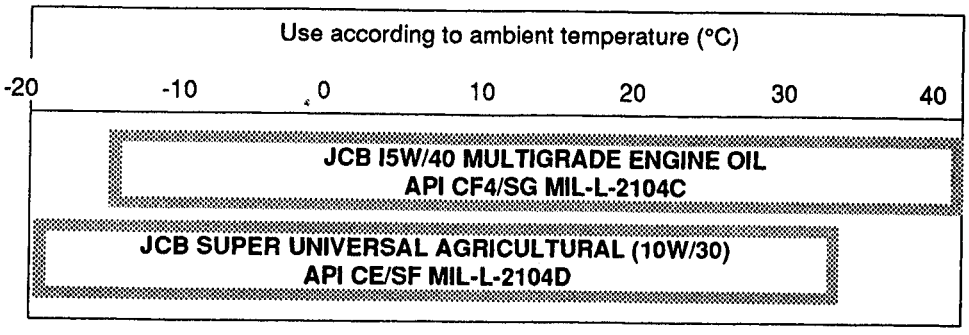
TRACK ROLLERS AND IDLER WHEEL	Engine Oil (see separate chart)	-	-	-
HYDRAULIC SYSTEM	JCB Special Hydraulic Fluid HP46	Vickers 35VQ25/V104C: Sundstrand, Denison and FZG Approval Tests	233 litres (51.3 UK gal)	350 litres (77 UK gal)
SWING RING - BEARINGS - GEAR TEETH	 JCB HP Grease JCB HP Grease	 Lithium based, No. 2 consistency	 - 13 kg (28.6 lb)	 - 22 kg (48.4 lb)
ALL OTHER GREASE POINTS	JCB HP Grease	Lithium based, No. 2 consistency		
COOLING SYSTEM	See **Coolant Mixtures**	ASTM D3306-74	25.8 litres (5.7 UK gal)	25 litres (5.5 UK gal)
FUEL TANK	See **Fuel System, Types of Fuel** in Operator Handbook	ASTM D975-66T Nos. 1D, 2D	280 litres (61.6 UK gal)	280 litres (61.6 UK gal)

ENGINE LUBRICATION CHART



Note: New engines DO NOT require a running-in period. The engine/machine should be used in a normal work cycle immediately; glazing of the piston cylinder bores, resulting in excessive oil consumption, could occur if the engine is gently run-in. Under no circumstances should the engine be allowed to idle for extended periods (e.g. warming-up without load).

Item	Fluids/ Lubricants	International Specification	Capacity	
			JS300LC	JS450LC
ENGINE	See separate chart	-	33 litres (7.26 UK gal)	45 litres (9.9 UK gal)
TRACK GEARBOX	JCB Gear Oil HD90	API-GL-5, MIL-L-2105C	2 x 8.5 litres 2 x 1.87 UK gal)	2 x 7 litres (2 x 1.54 UK gal)
SWING GEARBOX	JCB Gear Oil HD90	API-GL-5, MIL-L-2105C	14.5 litres (3.9 UK gal)	18 litres (4 UK gal)
TRACK ROLLERS AND IDLER WHEEL	Engine Oil (see separate chart)	-	-	-
HYDRAULIC SYSTEM	JCB Special Hydraulic Fluid HP46	Vickers 35VQ25/V104C: Sundstrand, Denison and FZG Approval Tests	320 litres (68.4 UK gal)	450 litres (99 UK gal)
SWING RING - BEARINGS - GEAR TEETH	 JCB HP Grease JCB HP Grease	 Lithium based, No. 2 consistency	 - 27 kg (59.4 lb)	 - 31 kg (68.2 lb)
ALL OTHER GREASE POINTS	JCB HP Grease	Lithium based, No. 2 consistency		
COOLING SYSTEM	See **Coolant Mixtures**	ASTM D3306-74	34 litres (7.5 UK gal)	50 litres (11 UK gal)
FUEL TANK	See **Fuel System, Types of Fuel** in Operator Handbook	ASTM D975-66T Nos. 1D, 2D	500 litres (110 UK gal)	500 litres (110 UK gal)
