General Index

JCB/2700 series engines

ALL PARTS CATALOGUES

This index is intended to assist in the location of items in the JCB/2700 Series engine Catalogues.

The General Information page in these catalogues gives advice on the correct location, and ordering of parts for a particular machine and engine.

	Index Section		Index Section
Alternator	7 2	Piston & Rings	1 3
Alternator Mountings	7 3	Push Rods	2 2
Belts	1 3	Radiator	4 3
		Rocker Shaft Assembly	2 2
Camshaft	1 4	 	
Controls—Stop & Throttle	6 3	Starter Motor	7 1
Crankshaft & Bearings	1 3		
Cylinder Block	1 2	 	
Cylinder Head & Cover	2 1	Tappets	2 2
		Thermostat	4 2
		Timing Gear	1 4
Engine—Complete & Short	1 1	 	
Engine Mountings	1 6	Water Pump	4 1
Exhaust Systems	3 3		
Fan	4 1		
Filter—Air	3 2		
Filters—Fuel	6 6		
Filter—Oil	5 3		
Filter—Sediment	6 5		
Flywheel & Adapters	1 5		
Fuel Systems	6 7		
Gasket Sets	9 1		
Hoses—Radiators	4 2		
Induction System	3 1		
Injectors & Pipework	6 2		
Injection Pump	6 1		
Lift Pump	6 4		
Manifold, Exhaust	3 3		
Manifold, Inlet	3 1		
Oil Pump & Pipework	5 2		
Oil Sump	5 1		

general information

1. Using the Catalogue

The catalogue is divided into the sections listed on the front cover. At the beginning of each section is a page number index giving the assemblies which make up the complete engine sub unit. The index also lists engine builds which apply to particular machines, and also machine serial number changes at which engine builds have changed. For Example:—

Description	806		807	
	Change No.	Build A	Change No	Build B
Water pump		4 1-1		4 1-1

JCB 806 machines, fitted with 2700 series engines, build 'A' will have machine or engine change numbers shown in the adjacent Change No. column and the new page number below the existing page number. The first Change No. listed is the one at which the engine build was introduced.

2. Abbreviations

A.R.	As Required
Assy.	Assembly.
M/C	Machine.
N.A.	Not Available.
No./Con.	Number Conversion — numbers changed for administration purposes. Use new numbers for all orders.
N.S.P.	Non Serviced Part.
R.H.	Right Hand
L.H.	Left Hand
S/S	Superseded
	use new part for all replacements, when stocks of old parts are exhausted, unless otherwise instructed.
STD	Standard
*	Indicates revised information.

3. Use of Change No. column (or Engine No. column)

Where a design change is made to a component, the New part number is listed directly below the Original. The machine number or engine number at which the change takes effect, or the reason for the change, is shown in the 'Change No' column. For Example:—

Item	Part No.	Change No.	Description	Qty off Build	
				A	B
1	01/500700	S949505	Water Pump	1	1
	01/500800			1	1

Part number 01/500800 replaces 01/500700 with effect from engine number S949505. If the old and new parts had been interchangeable, the Change No. column would show 'superseded' against the original part number.

4. Amendments

- A. Number Change Supplement (N.C.S.).
- (1) Records part numbers which have been changed or introduced since the last set of replacement pages or N.C.S.
 - (2) Complete with explanatory notes.
 - (3) Insert at front of catalogue, remove and destroy previous N.C.S.

- B. Replacement Pages
- (1) Issued to update catalogue, by either replacing existing pages or as additional pages.
 - (2) Complete with explanatory notes.
 - (3) Insert at correct position in catalogue, removing page of lower issue number.
 - (4) Retain replacement page index at front of catalogue, the index provides a check for the correct content of catalogue
