## **Foreword - Important notice regarding equipment servicing**

T8.275 [ZCRC02586 - ] NA, T8.300 [ZCRC02586 - ] NA, T8.330 [ZCRC02586 - ] NA, T8.360 [ZCRC02586 - ] NA, T8.390 [ZCRC02586 - ] NA, T8.420 [ZCRC02586 - ] NA

All repair and maintenance work listed in this manual must be carried out only by qualified dealership personnel, strictly complying with the instructions given, and using, whenever possible, the special tools.

Anyone who performs repair and maintenance operations without complying with the procedures provided herein shall be responsible for any subsequent damages.

The manufacturer and all the organizations of its distribution chain, including - without limitation - national, regional, or local dealers, reject any responsibility for damages caused by parts and/or components not approved by the manufacturer, including those used for the servicing or repair of the product manufactured or marketed by the manufacturer. In any case, no warranty is given or attributed on the product manufactured or marketed by the manufacturer in case of damages caused by parts and/or components not approved by the manufacturer.

The information in this manual is up-to-date at the date of the publication. It is the policy of the manufacturer for continuous improvement. Some information could not be updated due to modifications of a technical or commercial type, or changes to the laws and regulations of different countries.

In case of questions, refer to your NEW HOLLAND Sales and Service Networks.

## Safety rules

T8.275 NA, T8.300 NA, T8.330 NA, T8.360 NA, T8.390 NA, T8.420

### Personal safety

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible death or injury.

Throughout this manual and on machine decals, you will find the signal words DANGER, WARNING, and CAUTION followed by special instructions. These precautions are intended for the personal safety of you and those working with you.

Read and understand all the safety messages in this manual before you operate or service the machine.

**⚠ DANGER** indicates a hazardous situation which, if not avoided, will result in death or serious injury. The color associated with DANGER is RED.

**⚠ WARNING** indicates a hazardous situation which, if not avoided, could result in death or serious injury. The color associated with WARNING is ORANGE.

**⚠ CAUTION**, used with the safety alert symbol, indicates a hazardous situation which, if not avoided, could result in minor or moderate injury. The color associated with CAUTION is YELLOW.

### **FAILURE TO FOLLOW DANGER, WARNING, AND CAUTION MESSAGES COULD RESULT IN DEATH OR SERIOUS INJURY.**

### Machine safety

**NOTICE:** *Notice indicates a situation which, if not avoided, could result in machine or property damage. The color associated with Notice is BLUE.*

Throughout this manual you will find the signal word Notice followed by special instructions to prevent machine or property damage. The word Notice is used to address practices not related to personal safety.

### Information

**NOTE:** *Note indicates additional information which clarifies steps, procedures, or other information in this manual.*

Throughout this manual you will find the word Note followed by additional information about a step, procedure, or other information in the manual. The word Note is not intended to address personal safety or property damage.

## **Safety rules - General maintenance safety**

T8.275 [ZCRC02586 - ] NA, T8.300 [ZCRC02586 - ] NA, T8.330 [ZCRC02586 - ] NA, T8.360 [ZCRC02586 - ] NA, T8.390 [ZCRC02586 - ] NA, T8.420 [ZCRC02586 - ] NA

### **⚠ General maintenance safety ⚠**

Keep the area used for servicing the machine clean and dry. Clean up spilled fluids.

Service the machine on a firm, level surface.

Install guards and shields after you service the machine.

Close all access doors and install all panels after servicing the machine.

Do not attempt to clean, lubricate, clear obstructions, or make adjustments to the machine while it is in motion or while the engine is running.

Always make sure that working area is clear of tools, parts, other persons and pets before you start operating the machine.

Unsupported hydraulic cylinders can lose pressure and drop the equipment, causing a crushing hazard. Do not leave equipment in a raised position while parked or during service, unless the equipment is securely supported.

Jack or lift the machine only at jack or lift points indicated in this manual.

Incorrect towing procedures can cause accidents. When you tow a disabled machine follow the procedure in this manual. Use only rigid tow bars.

Stop the engine, remove the key, and relieve pressure before you connect or disconnect fluid lines.

Stop the engine and remove the key before you connect or disconnect electrical connections.

Scalding can result from incorrect removal of coolant caps. Cooling systems operate under pressure. Hot coolant can spray out if you remove a cap while the system is hot. Allow the system to cool before you remove the cap. When you remove the cap, turn it slowly to allow pressure to escape before you completely remove the cap.

Replace damaged or worn tubes, hoses, electrical wiring, etc.

The engine, transmission, exhaust components, and hydraulic lines may become hot during operation. Take care when you service such components. Allow surfaces to cool before you handle or disconnect hot components. Wear protective equipment when appropriate.

When welding, follow the instructions in the manual. Always disconnect the battery before you weld on the machine. Always wash your hands after you handle battery components.

---

## **Safety rules - Personal Protective Equipment (PPE)**

T8.275 [ZCRC02586 - ] NA, T8.300 [ZCRC02586 - ] NA, T8.330 [ZCRC02586 - ] NA, T8.360 [ZCRC02586 - ] NA, T8.390 [ZCRC02586 - ] NA, T8.420 [ZCRC02586 - ] NA

### **⚠ Personal Protective Equipment (PPE) ⚠**

Wear Personal Protective Equipment (PPE) such as hard hat, eye protection, heavy gloves, hearing protection, protective clothing, etc.

## **Safety rules - Do Not Operate tag**

T8.275 [ZCRC02586 - ] NA, T8.300 [ZCRC02586 - ] NA, T8.330 [ZCRC02586 - ] NA, T8.360 [ZCRC02586 - ] NA, T8.390 [ZCRC02586 - ] NA, T8.420 [ZCRC02586 - ] NA

### **⚠ Do Not Operate tag ⚠**

Before you start servicing the machine, attach a 'Do Not Operate' warning tag to the machine in an area that will be visible.

---

## Safety rules - Ecology and the environment

T8.275 [ZCRC02586 - ] NA, T8.300 [ZCRC02586 - ] NA, T8.330 [ZCRC02586 - ] NA, T8.360 [ZCRC02586 - ] NA, T8.390 [ZCRC02586 - ] NA, T8.420 [ZCRC02586 - ] NA

Soil, air, and water are vital factors of agriculture and life in general. When legislation does not yet rule the treatment of some of the substances required by advanced technology, sound judgment should govern the use and disposal of products of a chemical and petrochemical nature.

**NOTE:** *The following are recommendations that may be of assistance:*

- Become acquainted with and ensure that you understand the relative legislation applicable to your country.
- Where no legislation exists, obtain information from suppliers of oils, filters, batteries, fuels, antifreeze, cleaning agents, etc., with regard to their effect on man and nature and how to safely store, use, and dispose of these substances.
- Agricultural consultants will, in many cases, be able to help you as well.

### Helpful hints

- Avoid filling tanks using cans or inappropriate pressurized fuel delivery systems that may cause considerable spillage.
- In general, avoid skin contact with all fuels, oils, acids, solvents, etc. Most of them contain substances that may be harmful to your health.
- Modern oils contain additives. Do not burn contaminated fuels and or waste oils in ordinary heating systems.
- Avoid spillage when draining off used engine coolant mixtures, engine, gearbox and hydraulic oils, brake fluids, etc. Do not mix drained brake fluids or fuels with lubricants. Store them safely until they can be disposed of in a proper way to comply with local legislation and available resources.
- Modern coolant mixtures, i.e. antifreeze and other additives, should be replaced every two years. They should not be allowed to get into the soil, but should be collected and disposed of properly.
- Do not open the air-conditioning system yourself. It contains gases that should not be released into the atmosphere. Your NEW HOLLAND dealer or air conditioning specialist has a special extractor for this purpose and will have to recharge the system properly.
- Repair any leaks or defects in the engine cooling or hydraulic system immediately.
- Do not increase the pressure in a pressurized circuit as this may lead to a component failure.
- Protect hoses during welding as penetrating weld splatter may burn a hole or weaken them, allowing the loss of oils, coolant, etc.

---

## Torque - Minimum tightening torques for normal assembly

T8.275, T8.300, T8.330, T8.360, T8.390, T8.420

\* Pin quantity is determined by observing the wheel ends.

## INTRODUCTION

Measure the distance from the outer face of the hub (1) and bolting surface of the wheel (2), and count the number of pins (3) on the wheel end to determine axle type for your tractor.

RCPH11CCH074AAB 1

RCIL08CCH001EAA 2

### Tractor model and product identification number

Write your model number, product identification number (PIN) or serial number of major components on the lines provided. If needed, give these numbers to your dealer when you need parts or information for your machine.

 <b>CNH America LLC</b> Racine, WI 53404 U.S.A. Made In U.S.A.			
Type <b>1</b>	EEC Number <b>2</b>	Product Identification Number <b>3</b>	
<ul style="list-style-type: none"> <li>Total Permissible Mass (*): <b>4</b></li> <li>Permissible Front Axle Load (*): <b>5</b></li> <li>Permissible Rear Axle Load (*): <b>6</b></li> </ul> <small>(* Depending on the Tires)</small>		Permissible Towable Mass: <ul style="list-style-type: none"> <li>Unbraked Towable Mass: <b>7</b></li> <li>Independently-Braked Towable Mass: <b>8</b></li> <li>Inertia-Braked Towable Mass: <b>9</b></li> <li>Towable Mass Fitted with an Assisted Braking System: (Hydraulic or Pneumatic): <b>10</b></li> </ul>	
<small>RCIL11CCH008EAA 1</small>			

1. Type	Permissible towable mass:
2. EEC number	• 7. Unbraked towable mass
3. Product identification number	• 8. Independently brakes towable mass
4. Total permissible mass	• 9. Inertia braked towable mass
5. Permissible front axle load	• 10. Towable mass fitted with an assisted braking system (hydraulic or pneumatic)
6. Permissible rear axle load	

Model :

Serial number:

**NOTE:** Located on right hand front casting. Pin plate may be mounted vertically or horizontally.

RCPH11CCH117AAB 2

### Roll Over Protective System (ROPS) serial number

**NOTE:** Located on the right hand cab floor.

RCPH11CCH014AAB 3

---

**Engine serial number**

**NOTE:** Located on the valve cover. The serial number is also etched into the left hand side of the engine block, just below the oil cooler.

RAIL12TR02140AA 4

**Transmission serial number**

**NOTE:** Located on the right hand side of the transmission to the left of the main hydraulic filter.

RAIL12TR01410AA 5

**Powershift transmission**

RAIL12TR02191AA 6

**Auto Command**

---

## Axle serial number

Located on the rear left hand side of the NEW HOLLAND4.5 fixed, 4.75 fixed, 4.75 saddle suspended, 5.0 fixed and 5.0 saddle suspended front axle housings. (example shown)

Located on the rear right hand side of the Dana heavy duty fixed, 5.0 fixed and 5.0 fixed saddle suspended axles.

RAIL12TR02142AA 7

## Engine - Remove

T8.275, T8.300, T8.330, T8.360, T8.390, T8.420 [ZCRC02586 - ]

**Prior operation:**

Disconnect the batteries — **Battery - Disconnect (55.302)**

**Prior operation:**

Remove the hood — **Hood - Remove (90.100)**

**Prior operation:**

Recover the refrigerant — **Air conditioning - Recover (50.200)**

**Prior operation:**

Drain the coolant — **Engine cooling system - Emptying (10.400)**

**ATTENTION:** For tractors equipped with front PTO/hitch, refer to steps 80– 95 for additional disassembly instructions.

**NOTE:** Clean all fittings before disconnecting.

**NOTE:** Cap or plug all lines and ports when disconnecting hydraulic components.

1. Remove the nuts (1) securing the condenser/fuel cooler.

RCPH10CCH054BAB 1

2. Disconnect the refrigerant hose from the receiver/dryer (1) and the condenser outlet hose (2).

RCPH10CCH896AAB 2

3. Open the latch (1), and carefully remove the cooler from its mounting and set aside.

RCPH10CCH894AAB 3

4. Remove the nuts (1) securing the oil cooler to its support bracket.

RCPH10CCH055BAB 4

5. Disengage the hose clamps (1), tag and remove the fuel hoses at the cooler.

RCPH10CCH897AAB 5

6. Loosen the hydraulic hose fittings (1) at the oil cooler. Remove the hoses. Carefully remove the cooler and set aside.

**NOTE:** Be prepared to collect some hydraulic fluid.

RCPH10CCH898AAB 6

7. Remove the bolts (1) securing the right hose bracket (2).

RCPH10CCH899AAB 7
