SERVICE MANUAL

Workmaster™ 25S 25 Hp, without cab

Contents

INTRODUCTION

| | |
|---|------|
| Engine..... | 10 |
| [10.001] Engine and crankcase | 10.1 |
| [10.216] Fuel tanks | 10.2 |
| [10.206] Fuel filters | 10.3 |
| [10.202] Air cleaners and lines | 10.4 |
| [10.254] Intake and exhaust manifolds and muffler | 10.5 |
| [10.400] Engine cooling system | 10.6 |
| [10.414] Fan and drive | 10.7 |
| Four-Wheel Drive (4WD) system | 23 |
| [23.314] Drive shaft..... | 23.1 |
| Front axle system | 25 |
| [25.100] Powered front axle | 25.1 |
| [25.102] Front bevel gear set and differential | 25.2 |
| [25.108] Final drive hub, steering knuckles, and shafts | 25.3 |
| Rear axle system..... | 27 |
| [27.100] Powered rear axle..... | 27.1 |
| [27.106] Rear bevel gear set and differential | 27.2 |
| [27.120] Planetary and final drives | 27.3 |
| Hydrostatic drive..... | 29 |
| [29.200] Mechanical control | 29.1 |
| [29.218] Pump and motor components..... | 29.2 |
| [29.202] Hydrostatic transmission | 29.3 |
| Power Take-Off (PTO) | 31 |
| [31.101] Rear mechanical control | 31.1 |
| [31.104] Rear electro-hydraulic control..... | 31.2 |

| | |
|--|-----------|
| [31.110] One-speed rear Power Take-Off (PTO) | 31.3 |
| Brakes and controls | 33 |
| [33.120] Mechanical service brakes | 33.1 |
| [33.110] Parking brake or parking lock | 33.2 |
| Hydraulic systems..... | 35 |
| [35.000] Hydraulic systems..... | 35.1 |
| [35.300] Reservoir, cooler, and filters..... | 35.2 |
| [35.104] Fixed displacement pump..... | 35.3 |
| [35.350] Safety and main relief valves | 35.4 |
| [35.114] Three-point hitch control valve | 35.5 |
| [35.355] Hydraulic hand control | 35.6 |
| [35.726] Excavator and backhoe hydraulic controls..... | 35.7 |
| Hitches, drawbars, and implement couplings..... | 37 |
| [37.120] Rear three-point hitch linkage..... | 37.1 |
| Steering..... | 41 |
| [41.101] Steering control | 41.1 |
| [41.106] Tie rods..... | 41.2 |
| [41.206] Pump..... | 41.3 |
| [41.216] Cylinders | 41.4 |
| Wheels | 44 |
| [44.511] Front wheels..... | 44.1 |
| [44.520] Rear wheels..... | 44.2 |
| Electrical systems | 55 |
| [55.000] Electrical system | 55.1 |
| [55.100] Harnesses and connectors..... | 55.2 |
| [55.201] Engine starting system | 55.3 |
| [55.301] Alternator..... | 55.4 |

| | |
|--|-----------|
| [55.302] Battery..... | 55.5 |
| [55.202] Cold start aid | 55.6 |
| [55.011] Fuel tank system | 55.7 |
| [55.010] Fuel injection system..... | 55.8 |
| [55.012] Engine cooling system | 55.9 |
| [55.013] Engine oil system | 55.10 |
| [55.610] Ground speed control | 55.11 |
| [55.522] Cab Power Take-Off (PTO) controls | 55.12 |
| [55.031] Parking brake electrical system | 55.13 |
| [55.404] External lighting | 55.14 |
| [55.405] External lighting switches and relays | 55.15 |
| [55.510] Cab or platform harnesses and connectors..... | 55.16 |
| [55.408] Warning indicators, alarms, and instruments | 55.17 |
| [55.027] Cruise control | 55.18 |
| Platform, cab, bodywork, and decals | 90 |
| [90.114] Operator protections | 90.1 |
| [90.120] Mechanically-adjusted operator seat..... | 90.2 |
| [90.100] Engine hood and panels | 90.3 |

Foreword - Important notice regarding equipment servicing

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

All repair and maintenance work listed in this manual must be carried out only by qualified dealership personnel, strictly complying with the instructions given, and using, whenever possible, the special tools.

Anyone who performs repair and maintenance operations without complying with the procedures provided herein shall be responsible for any subsequent damages.

The manufacturer and all the organizations of its distribution chain, including - without limitation - national, regional, or local dealers, reject any responsibility for damages caused by parts and/or components not approved by the manufacturer, including those used for the servicing or repair of the product manufactured or marketed by the manufacturer. In any case, no warranty is given or attributed on the product manufactured or marketed by the manufacturer in case of damages caused by parts and/or components not approved by the manufacturer.

The manufacturer reserves the right to make improvements in design and changes in specifications at any time without notice and without incurring any obligation to install them on units previously sold. Specifications, descriptions, and illustrative material herein are as accurate as known at time of publication but are subject to change without notice.

In case of questions, refer to your NEW HOLLAND Sales and Service Networks.

Safety rules

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

Personal safety

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible death or injury.

Throughout this manual you will find the signal words DANGER, WARNING, and CAUTION followed by special instructions. These precautions are intended for the personal safety of you and those working with you.

Read and understand all the safety messages in this manual before you operate or service the machine.

 DANGER indicates a hazardous situation that, if not avoided, will result in death or serious injury.

 WARNING indicates a hazardous situation that, if not avoided, could result in death or serious injury.

 CAUTION indicates a hazardous situation that, if not avoided, could result in minor or moderate injury.

FAILURE TO FOLLOW DANGER, WARNING, AND CAUTION MESSAGES COULD RESULT IN DEATH OR SERIOUS INJURY.

Machine safety

NOTICE: Notice indicates a situation that, if not avoided, could result in machine or property damage.

Throughout this manual you will find the signal word Notice followed by special instructions to prevent machine or property damage. The word Notice is used to address practices not related to personal safety.

Information

NOTE: Note indicates additional information that clarifies steps, procedures, or other information in this manual.

Throughout this manual you will find the word Note followed by additional information about a step, procedure, or other information in the manual. The word Note is not intended to address personal safety or property damage.

Safety rules - Ecology and the environment

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

Soil, air, and water quality is important for all industries and life in general. When legislation does not yet rule the treatment of some of the substances that advanced technology requires, sound judgment should govern the use and disposal of products of a chemical and petrochemical nature.

Familiarize yourself with the relative legislation applicable to your country, and make sure that you understand this legislation. Where no legislation exists, obtain information from suppliers of oils, filters, batteries, fuels, anti-freeze, cleaning agents, etc., with regard to the effect of these substances on man and nature and how to safely store, use, and dispose of these substances.

Helpful hints

- Avoid the use of cans or other inappropriate pressurized fuel delivery systems to fill tanks. Such delivery systems may cause considerable spillage.
- In general, avoid skin contact with all fuels, oils, acids, solvents, etc. Most of these products contain substances that may be harmful to your health.
- Modern oils contain additives. Do not burn contaminated fuels and or waste oils in ordinary heating systems.
- Avoid spillage when you drain fluids such as used engine coolant mixtures, engine oil, hydraulic fluid, brake fluid, etc. Do not mix drained brake fluids or fuels with lubricants. Store all drained fluids safely until you can dispose of the fluids in a proper way that complies with all local legislation and available resources.
- Do not allow coolant mixtures to get into the soil. Collect and dispose of coolant mixtures properly.
- The air-conditioning system contains gases that should not be released into the atmosphere. Consult an air-conditioning specialist or use a special extractor to recharge the system properly.
- Repair any leaks or defects in the engine cooling system or hydraulic system immediately.
- Do not increase the pressure in a pressurized circuit as this may lead to a component failure.
- Protect hoses during welding. Penetrating weld splatter may burn a hole or weaken hoses, allowing the loss of oils, coolant, etc.

Battery recycling

Batteries and electric accumulators contain several substances that can have a harmful effect on the environment if the batteries are not properly recycled after use. Improper disposal of batteries can contaminate the soil, groundwater, and waterways. NEW HOLLAND strongly recommends that you return all used batteries to a NEW HOLLAND dealer, who will dispose of the used batteries or recycle the used batteries properly. In some countries, this is a legal requirement.

Mandatory battery recycling

NOTE: The following requirements are mandatory in Brazil.

Batteries are made of lead plates and a sulfuric acid solution. Because batteries contain heavy metals such as lead, CONAMA Resolution 401/2008 requires you to return all used batteries to the battery dealer when you replace any batteries. Do not dispose of batteries in your household garbage.

Points of sale are obliged to:

- Accept the return of your used batteries
- Store the returned batteries in a suitable location
- Send the returned batteries to the battery manufacturer for recycling

Torque - Standard torque data for hydraulic connections

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

General information

- Hydraulic connections require a minimum assembly torque in order to provide zero leakage at rated pressure with adequate fatigue resistance. Over-torquing of a hydraulic connection can also lead to leakage or failure. For some connections, NEW HOLLAND requires a different torque value than is listed in the ISO and SAE standards.
- The torque values in this document should be used whenever possible or applicable.

NOTICE: Always follow the instructions in this manual for specific torque values when you service components. The information in this section is for general guidance only when a procedure contains no specific torque value.

Tolerance

- The tolerance for all torque values is $\pm 10\%$. This tolerance must include all assembly variation, not only the torque wrench repeatability.

Lubrication

Application of grease or other lubricants to hydraulic connectors should be avoided. If clean hydraulic oil is already on the connection, it is not required to remove the oil. Generally, application of grease:

- May cause a significant change in the torque required to properly tighten the connection.
- May reduce the connection's resistance to vibration.
- Excessive grease may displace an elastomer seal during tightening.
- Grease extrusion when connection is tightened may be mistaken for leakage.

NEW HOLLAND products generally use O-Ring Boss (ORB) connectors that have Teflon™-coated O-rings, eliminating the need for O-ring lubrication during installation. For connections which are made into aluminum manifolds or with stainless steel connectors, it may be required to apply a lubricant to prevent galling.

Use of **LOCTITE®** and other thread-locking compounds is prohibited. These compounds:

- May cause a significant change in the torque required to properly tighten the connections.
- Reduce the serviceability of the joint.
- May prevent the O-ring from properly sealing if the compound gets on the O-ring.

Torque values for metric O-Ring Boss (ORB) port connections

| Metric thread | S-Series * | | L-Series ** | |
|----------------------|--------------------------------------|--|--------------------------------------|--|
| | Ferrous N·m (lb ft) ± 10% | Non-Ferrous N·m (lb ft) ± 10% | Ferrous N·m (lb ft) ± 10% | Non-Ferrous N·m (lb ft) ± 10% |
| M8 x 1 | 10.5 (7.7) | 6.3 (4.6) | 8.5 (6.3) | 5 (3.7) |
| M10 x 1 | 21 (15.5) | 12.5 (9.2) | 15.5 (11.4) | 9.3 (6.9) |
| M12 x 1.5 | 37 (27.3) | 22 (16.2) | 27 (19.9) | 16 (11.8) |
| M14 x 1.5 | 47 (34.7) | 28 (20.7) | 37 (27.3) | 22 (16.2) |
| M16 x 1.5 | 58 (42.8) | 35 (25.8) | 42 (31) | 25 (18.4) |
| M18 x 1.5 | 74 (54.6) | 44 (32.5) | 47 (34.7) | 28 (20.7) |
| M22 x 1.5 | 105 (77.4) | 63 (46.5) | 63 (46.5) | 38 (28) |
| M27 x 2 | 178 (131.3) | 107 (78.9) | 105 (77.4) | 63 (46.5) |
| M30 x 2 | 225 (166) | 135 (99.6) | 136 (100.3) | 82 (60.5) |
| M33 x 2 | 325 (239.7) | 195 (143.8) | 168 (123.9) | 101 (74.5) |
| M42 x 2 | 345 (254.5) | 207 (152.7) | 220 (162.3) | 132 (97.4) |
| M48 x 2 | 440 (324.5) | 264 (194.7) | 273 (201.4) | 164 (121) |
| M60 x 2 | 525 (387.2) | 315 (232.3) | 330 (243.4) | 198 (146) |

* S-Series connectors are used with O-Ring Face Seals (ORFS).

** L-Series connectors are used with 37° flare.

Torque values for metric O-Ring Boss (ORB) port plugs

| Metric thread | Ferrous | | Non-ferrous |
|----------------------|---|---|--------------------------|

Basic instructions - Shop and assembly

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

Shimming

For each adjustment operation, select adjusting shims and measure the adjusting shims individually using a micrometer, then add up the recorded values. Do not rely on measuring the entire shimming set, which may be incorrect, or the rated value shown on each shim.

Rotating shaft seals

For correct rotating shaft seal installation, proceed as follows:

1. Before assembly, allow the seal to soak in the oil it will be sealing for at least thirty minutes.
2. Thoroughly clean the shaft and check that the working surface on the shaft is not damaged.
3. Position the sealing lip facing the fluid.

NOTE: *With hydrodynamic lips, take into consideration the shaft rotation direction and position the grooves so that they will move the fluid towards the inner side of the seal.*

4. Coat the sealing lip with a thin layer of lubricant (use oil rather than grease). Fill the gap between the sealing lip and the dust lip on double lip seals with grease.
5. Insert the seal in its seat and press down using a flat punch or seal installation tool. Do not tap the seal with a hammer or mallet.
6. While you insert the seal, check that the seal is perpendicular to the seat. When the seal settles, make sure that the seal makes contact with the thrust element, if required.
7. To prevent damage to the seal lip on the shaft, position a protective guard during installation operations.

O-ring seals

Lubricate the O-ring seals before you insert them in the seats. This will prevent the O-ring seals from overturning and twisting, which would jeopardize sealing efficiency.

Sealing compounds

Apply a sealing compound on the mating surfaces when specified by the procedure. Before you apply the sealing compound, prepare the surfaces as directed by the product container.

Spare parts

Only use CNH Original Parts or NEW HOLLAND Original Parts.

Only genuine spare parts guarantee the same quality, duration, and safety as original parts, as they are the same parts that are assembled during standard production. Only CNH Original Parts or NEW HOLLAND Original Parts can offer this guarantee.

When ordering spare parts, always provide the following information:

- Machine model (commercial name) and Product Identification Number (PIN)
- Part number of the ordered part, which can be found in the parts catalog

Protecting the electronic and/or electrical systems during charging and welding

To avoid damage to the electronic and/or electrical systems, always observe the following practices:

1. Never make or break any of the charging circuit connections when the engine is running, including the battery connections.
2. Never short any of the charging components to ground.
3. Always disconnect the ground cable from the battery before arc welding on the machine or on any machine attachment.
 - Position the welder ground clamp as close to the welding area as possible.
 - If you weld in close proximity to a computer module, then you should remove the module from the machine.
 - Never allow welding cables to lie on, near, or across any electrical wiring or electronic component while you weld.
4. Always disconnect the negative cable from the battery when charging the battery in the machine with a battery charger.

NOTICE: *If you must weld on the unit, you must disconnect the battery ground cable from the machine battery. The electronic monitoring system and charging system will be damaged if this is not done.*

5. Remove the battery ground cable. Reconnect the cable when you complete welding.

WARNING

Battery acid causes burns. Batteries contain sulfuric acid.

Avoid contact with skin, eyes or clothing. Antidote (external): Flush with water. Antidote (eyes): flush with water for 15 minutes and seek medical attention immediately. Antidote (internal): Drink large quantities of water or milk. Do not induce vomiting. Seek medical attention immediately. Failure to comply could result in death or serious injury.

W0111A

Special tools

The special tools that NEW HOLLAND suggests and illustrate in this manual have been specifically researched and designed for use with NEW HOLLAND machines. The special tools are essential for reliable repair operations. The special tools are accurately built and rigorously tested to offer efficient and long-lasting operation.

By using these tools, repair personnel will benefit from:

- Operating in optimal technical conditions
- Obtaining the best results
- Saving time and effort
- Working in safe conditions

| Front wheel --- disc-to-hub: | |
| FWD | 43 – 57 N·m (32 – 42 lb ft) |
| Rear wheel --- disc-to axle | 43 – 57 N·m (32 – 42 lb ft) |
| | |
| Roll Over Protective Structure (ROPS) attaching bolt torques | |
| ROPS to rear axle | 76 N·m (56 lb ft) |
| Seat belt | 54 N·m (40 lb ft) |

General specification

| | |
|------------------------------------|----|
| Workmaster™ 25S 25 Hp, without cab | NA |
|------------------------------------|----|

Fatty Acid Methyl Ester Biodiesel (Biodiesel Fuel) consists of a family of fuels derived from vegetable oils treated with methyl esters.

NOTICE: Biodiesel Fuel blends are approved for your engine only if they comply with **EN14214** Specification Standards or **ASTM D6751**.

NOTICE: It is imperative that you check which blend is approved for your engine with your NEW HOLLAND dealer. Be aware that the use of Biodiesel Fuel that does not comply with the Standards mentioned above could lead to severe damage to the engine and fuel system of your machine. The use of fuels that are not approved may void NEW HOLLAND Warranty coverage.

Biodiesel fuel usage conditions

NOTICE: The Biodiesel Fuel must meet the fuel Specification mentioned above.

Biodiesel Fuel must be purchased from a trusted supplier that understands the product and maintains good fuel quality. Biodiesel Fuel must be pre-blended by the supplier. Mixing Biodiesel Fuels on-site can result incorrect mixture that can lead to problems with both engine and fuel system.

Engine performance is affected by the use of Biodiesel Fuel. There may be up to **12%** reduction in power or torque depending on the blend used.

NOTICE: DO NOT modify the engine and/or injection pump settings to recover the reduced performance.

The reduced power must be accepted if using any Biodiesel Fuel blend.

Some modification may be required to allow your engine to run Biodiesel Fuel. Consult you dealer for complete information on these modifications.

Biodiesel Fuel has a higher cloud point than Diesel Fuel.

NOTICE: The use of high Biodiesel Fuel blends are not recommended in cold weather conditions.

With Biodiesel Fuels, it may be necessary to change the engine oil, engine oil filter and fuel filter elements more frequently than with Diesel Fuels. Biodiesel Fuel can remove rust and particles from the inside of on-site fuel storage tanks that would normally adhere to the sides of the tank. Like particle deposits that commonly occur with Diesel Fuel, these particles can become trapped by the machine fuel filters, causing blockage and shortening filter life. In cold weather, this is more likely to happen. Consult your NEW HOLLAND dealer for information on cold weather operation and proper maintenance intervals when using any Biodiesel Fuel blend.

When handling Biodiesel Fuel, care must be taken not to allow water into the fuel supply. Biodiesel Fuel will actually attract moisture from the atmosphere.

Fuel tanks must be kept as full as possible to limit the amount of air and water vapors in them. It may be necessary to drain the fuel filter water tap more frequently.

Potential oxidation and stability could be a problem with the fuel stored in the machine.

NOTICE: Machines must not be stored for more than three months with Biodiesel Fuel blends in the fuel system.

If long storage periods are necessary, the engine must run on Diesel Fuel for 20 hours to flush the Biodiesel Fuel out of the engine fuel system prior to storage.

NOTICE: Biodiesel Fuel must not be stored in on-site storage tanks for more than three months.

Any spillage of Biodiesel Fuel must be cleaned up immediately before it can cause damage to the environment and the paint finish of the machine.

Before using Biodiesel Fuel blends you should consult with your dealer to receive full information about the approved blend for your machine and any detailed conditions of its usage.

NOTICE: Be aware that not fulfilling the requirements and conditions of Biodiesel Fuel usage will void your machine's NEW HOLLAND Warranty coverage.

INTRODUCTION

NHIL17CT01124FA 2

Product identification

Workmaster™ 25S 25 Hp, without cab

NA

Chassis number

The Product Identification Number (PIN) plate **(1)** is located on the left-hand side of the frame, near the left front wheel.

The numbers on the plate are important in the event your tractor should require future service.

NHIL17CT01347AA 1

Engine number

The Product Identification Number (PIN) plate **(2)**, for the engine is located on the forward end of the valve cover.

The numbers on the plate are important in the event your engine should require future service.

NHIL17CT01119AA 2

Transmission number

The Product Identification Number (PIN) plate **(3)**, for the transmission is located below the Power Take-Off (PTO) shield.

The numbers on the plate are important in the event your transmission should require future service.

NHIL17CT01120AA 3

Emissions plate

The emissions plate **(4)** is located aft of the PIN plate.
