## **GLASS REFERENCE BOOK**

### **Forward**

This book is issued to enable the TEREX Distributor to procure operator cab glass locally to fulfil customer orders and requirements. Shipment of glass from Terex Equipment Limited is impractical, and special packaging required makes the costs unreasonably high. Despite this extra cost, breakage and resulting time delays in delivery create hardship for our customers.

Cutting glass is a skill unto itself and this book is not intended to teach that skill. However, the dimensions and data included within should enable an experienced person to produce replacements for the current production build trucks of Terex Equipment Limited.

Individual glass part number references are detailed in the appropriate truck parts book.

## **GLASS REFERENCE BOOK**

### **Contents**

Page	Contents
1 - 5	TA25/27/30 (Gen 7) Articulated Dump Truck Glass
6 - 9	TA35/40 Articulated Dump Truck Glass
